## 1. Automobile Repair, Maintenance, Fueling, and Cleaning

### Applicable SIC Codes

4173 – Bus Terminals and Service Facilities  
4231 – Terminal and Joint Terminal Maintenance Facilities for Motor Freight Transportation  
7533 – Automotive Exhaust System Repair Shops  
7534 – Tire Re-treading and Repair Shops  
7537 – Automotive Transmission Repair Shops  
7538 – General Automotive Repair Shops  
7539 – Automotive Repair Shops, Nec  
7549 – Automotive Services (wrecking, undercoating, rust proofing, lubrication)

### Description

This category includes establishments engaged in the repair, maintenance, fueling and cleaning of automobiles or similar vehicles. General operations at these facilities consist of repairing engines, transmissions, suspensions, and other mechanical components of the vehicle not generally associated with the body or interior. Additional operations include the removal and replacement of vehicle fluids including fuel and the cleaning of automotive parts and equipment. This category includes but is not limited to service stations, auto mechanics, tire repair and replacement, lube and oil service facilities.

Table 7.2.1 lists the Pollutant-generating Activities potentially associated with automobile repair, maintenance, fueling and cleaning, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.1 – Pollutant-generating Activities and Associated Pollutants of Concern for Automobile Repair, Maintenance, Fueling, and Cleaning**

## 2. Airplane and Boat Repair, Maintenance, Fueling and Cleaning

### Applicable SIC Codes

4581 – Airports, Flying Fields, and Services (Aircraft Servicing, Maintenance and Cleaning)

3731 – Ship Building and Repairing

3732 – Boat Building and Repairing

### Description

This category includes establishments primarily engaged in operating and maintaining airports and flying fields; in servicing, repairing (except on a factory basis), maintaining, and storing aircraft; and in furnishing coordinated handling services. Operations at these facilities generally consist of mechanical maintenance of the airplane, which may include engine repair, hydraulic repair, fluid removal/replacement and for this category could include body and interior components that are mechanical in nature.

It also includes establishments primarily engaged in the repair, maintenance fueling and cleaning of ships, barges, boats and lighters. Operations include boat and ship repairs not conducted in marinas, which usually consist mechanical maintenance of ships, boats etc., which may include engine repair, driveline repair, fluid removal/replacement and for this category could include body and interior components that are mechanical in nature.

Table 7.2.2 lists the Pollutant-generating Activities potentially associated with airplane and boat repair, maintenance, fueling, and cleaning, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.2 – Pollutant-generating Activities and Associated Pollutants of Concern for Airplane and Boat Repair, Maintenance, Fueling, and Cleaning**

### 3. Equipment Repair, Maintenance, Fueling, and Cleaning

#### Applicable SIC Codes

7519 – Utility Trailer Rentals  
7353 – Heavy Construction Equipment Rentals  
7359 – Equipment Rental  
7623 – Refrigeration Services and Repair (Refrigerator, HVAC, etc.)  
7692 – Welding Repair  
7699 – Equipment Repair  
7623 – Refrigeration Service and Repair  
7699 (Repair Shops and Related Services, Not Else Classified)

#### Description

Establishments primarily engaged in the repair, maintenance, fueling and cleaning of equipment. Operations generally include engine repair, driveline repair, fuel system maintenance and repair, fluid removal/replacement and degreasing of components and parts.

Table 7.2.3 lists the Pollutant-generating Activities potentially associated with equipment repair, maintenance, fueling and cleaning, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.3 – Pollutant-generating Activities and Associated Pollutants of Concern for Equipment Repair, Maintenance, Fueling and Cleaning**

#### 4. Vehicle Body Repair and Painting

##### Applicable SIC Codes

7532 – Top & body repair & paint shops

7536 – Automotive Glass Replacement Shops

7549 – Automotive Services (wrecking, undercoating, rust proofing, lubrication)

##### Description

Establishments primarily engaged in the repair of automotive tops, bodies, and interiors, or automotive painting and refinishing. Operations at these facilities generally include exterior, interior and frame repair of vehicles, which may include windshield removal/replacement, metal parts fabrication, and removing and replacing fluids to gain access to areas requiring repair.

Table 7.2.4 lists the Pollutant-generating Activities potentially associated vehicle body repair and painting, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.4 – Pollutant-generating Activities and Associated Pollutants of Concern for Vehicle Body Repair and Painting**

## 5. Parking Lots and Storage Facilities

### Applicable SIC Codes

4225 – General Warehousing and Storage

4226 – Special Warehousing and Storage, Not Elsewhere Classified

7521 – Automotive Parking

### Description

Establishments provide storage and parking facilities for short term and long term automotive storage. Operations at these facilities generally consist of supplying a location for cars to be securely stored or parked, which may include preparing cars for long term storage by removing fluids parts or generally moth balling the vehicle.

Table 7.2.5 lists the Pollutant-generating Activities potentially associated with parking lots and storage facilities, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.5 – Pollutant-generating Activities and Associated Pollutants of Concern for Parking Lots and Storage Facilities**

## **6. Retail and Wholesale Fueling**

### Applicable SIC Codes

5541 – Gasoline Service Stations

5172 – Petroleum and Petroleum Products Wholesalers, Except Bulk Stations and Terminals

### Description

Establishments primarily engaged in selling fuels and lubricants for motor vehicles. Operations could include key card services and retail establishments that provide petroleum, ethanol, and other vehicle fueling as well as lubricant products.

Table 7.2.6 lists the Pollutant-generating Activities potentially associated with retail and wholesale fueling, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.6 – Pollutant-generating Activities and Associated Pollutants of Concern for Retail and Wholesale Fueling**

## 7. Eating and Drinking Establishments

### Applicable SIC Codes

5141 – Groceries, General Line  
5149 – Groceries and related Products, Not Elsewhere Classified  
5411 – Grocery Stores  
5421 – Meat and Fish (Seafood) Markets, Including Freezer Provisioners  
5499 – Miscellaneous Food Stores  
5812 – Eating Places  
5813 – Drinking Places (Alcoholic Beverages)  
5999 – Miscellaneous Retail Stores, Not Elsewhere Classified

### Description

Establishments primarily engaged in providing prepared or processed foods and beverages to the public. Operations usually including baking, frying, roasting and general preparation of food and the sell and distribution of processed beverages.

The County Department of Environmental Health Food and Housing Division (FHD) currently conducts inspections of food service Countywide. There are 18 cities within the County with more than 12,000 retail food facilities, including over 6,000 restaurants. In order to safeguard public health and to the environment most of these facilities are inspected an average of four times a year. Thus, any person operating a retail food facility (including vending vehicles or a catering business) is required by law to apply for and obtain a valid public health permit.

An eating and drinking establishment means an “operation that stores, prepares packages, serves, vends, or otherwise provides human consumption at the retail level.” Overall, this category includes: restaurants, cafeterias, groceries stores, bakeries, delicatessens or all facility requiring a Health Department permit for food preparation. (COSD Food and Housing).

Table 7.2.7 lists the Pollutant-generating Activities potentially associated with eating and drinking establishments, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.7 – Pollutant-generating Activities and Associated Pollutants of Concern for Food Service Facilities**

Priority PGA (◆)	PGA Reference Number (see Attachment 6.X)	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)

## 8. Pest Control Services

### Applicable SIC Codes

7342 – Disinfecting and Pest Control Services

0721—Crop Protection

0762—Farm Management Services

0782—Lawn & Garden Services

### Description

This category includes establishments primarily engaged in providing pesticide application services. Pest control services conduct mixing and application of pesticides (herbicides, fungicides, or insecticides) using sprays, dusts, vapors, baits, or soil incorporation on trees, shrubs, lawns, botanical crops, or structures. Conducting pest control requires specific training and State or Federal certification to ensure a proper delivery of chemicals into the surrounding environment.

Table 7.2.8 lists the Pollutant-generating Activities potentially associated with pesticide application activities and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.8 – Pollutant-generating Activities and Associated Pollutants of Concern for Pest Control Services**

## 9. Nurseries and Greenhouses

### Applicable SIC Codes

0181 (Ornamental Floriculture and Nursery Products)

8422 (Botanical or Zoological Gardens)

### Description

This category includes establishments that have collections of a wide variety of plants or animals for public display or categorized and documented for scientific purposes. The Department of Agriculture, Weights and Measures (AWM) regulates these facilities. Currently there are no botanical gardens in the AWM current inventory.

This category includes establishments primarily engaged in growing plants to offer for sale for planting, propagation, or ornamentation. Operations generally include the cutting, trimming and arrangement of plants and other ornamentals for sale to the public.

Table 7.2.9 lists the Pollutant-generating Activities potentially associated with Nurseries, Greenhouses, and Botanical Gardens, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.9 – Pollutant-generating Activities and Associated Pollutants of Concern for Nurseries and Greenhouses**

Priority PGA (◆)	PGA Reference Number (see Attachment 6.X)	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)

## 10. Cemeteries

### Applicable SIC Codes

6553 – Cemetery Subdividers and Developers  
0782 – Law and Garden Services  
0783 – Ornamental Shrub and Tree Services

### Description

This category includes establishments specifically designated areas set aside to bury the deceased. Operations that generally occur may include mowing, trimming, planting, watering, fertilizing, digging, raking, and sprinkler installation. Landscape activities are conducted to improve the appearance, health, and value of the cemetery scenery. The Department of Agriculture, Weights and Measures (AWM) regulates these facilities.

Table 7.2.10 lists the Pollutant-generating Activities potentially associated with cemetery activities and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.10 – Pollutant-generating Activities and Associated Pollutants of Concern for Cemeteries**

## 11. Golf Courses

### Applicable SIC Codes

7992 (Public Golf Courses)

7997 (Membership Sports and Recreation Clubs)

### Description

This category includes public and private golf and country clubs. Operations at these facilities generally consist of mowing, trimming, planting, watering, fertilizing, digging, raking, sprinkler installation and the general upkeep of water bodies used as ornamental landscaping. AWM currently conducts inspections to evaluate compliance within stormwater regulations.

Table 7.2.11 lists the Pollutant-generating Activities potentially associated with golf courses activities and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

## 12. Parks and Other Recreational Facilities

### Applicable SIC Codes

7997 (Membership Sports and Recreation Clubs)

### Description

This category includes establishments that specifically correspond to a bounded area of land, usually in its natural or semi-natural (landscaped) state, that was set aside for a sport or a recreational purpose for a fairly large group of people. The most prevalent recreational facility in the County other than golf courses are paint ball fields. Paint balling is a sport in which participants use liquid-paint that is captured within spherical gelatin capsules containing primarily non-toxic water-soluble substances and dyes. DPW currently conducts parks and other recreational facility inspections to evaluate compliance within stormwater regulations.

Table 7.2.12 lists the Pollutant-generating Activities potentially associated with recreational parks, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.12 – Pollutant-generating Activities and Associated Pollutants of Concern for Parks and Other Recreational Facilities**

### 13. Equine Facilities

#### Applicable SIC Codes

0272 (Horses and other Equines)  
0279 (Animal Specialties, Not Elsewhere Classified)  
0291 (General Farms, Primarily Livestock and Animal Specialties)  
0752 (Animal Specialty Services, Except Veterinary)  
7948 (Services-Racing, Including Track Operation)  
7999 (Amusement and Recreation Services, Not Else Classified)

#### Description

This category includes establishments primarily engaged in selling, transferring, adopting, breeding, boarding, training, grooming, sheltering, or rescuing pets, livestock, or large animals.

This category includes establishments primarily engaged in the operation of riding, training, breeding, boarding, or driving horses; it includes both use of horses for practical, working purposes as well as recreational activities and competitive sports. This category does not include veterinary services.

Table 7.2.13 lists the Pollutant-generating Activities potentially associated with equestrian activities and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.13 – Pollutant-generating Activities and Associated Pollutants of Concern for Equine Facilities**

#### **14. Pet-related Facilities**

<u>Applicable SIC Codes</u>
-----------------------------

0752 (Animal Specialty Services, Except Veterinary)
---

##### Description

This category includes establishments primarily engaged in pet grooming and washing, housing or refuge. Pet Grooming operations generally consist of washing and trimming of animals. Animal kennels are structures such as cages, gates, buildings or yards that house large amounts of cats or dogs and could include pet motels and dog training centers. Operations generally occurring at kennels include animal feeding, washing, clipping and disposal of animal waste.

Table 7.2.14 lists the Pollutant-generating Activities potentially associated with pet-related activities and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

## 15. Building Material Retailers and Storage

### Applicable SIC Codes

5031 – Wholesale Lumber, Plywood, Millwork & Wood panels

5039 – Construction Materials

### Description

#### **Retailers**

This category includes establishments primarily engaged in the sale of general line of building materials. Materials may include but are not limited to lumber, flooring, molding, doors, sashes, frames, other millwork, roofing materials, stone, masonry materials, insulation, paint, brick, tile, cement, sand, and gravel.

#### **Storage**

This category includes businesses that store or house building materials and supplies short term or for extended periods of time before they are delivered to a buyer.

Table 7.2.15 lists the Pollutant-generating Activities potentially associated with retailers and storage facilities, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

## 16. Marinas

### Applicable SIC Codes

4493 – Marinas

### Description

This category includes establishments primarily engaged in the repair, maintenance, and cleaning of ships and boats. Operations may include engine repair, driveline repair, fluid removal/replacement and for this category could include body and interior components that are mechanical in nature. The marina may also have re-fueling, washing and repair facilities, may offer out-of-water-storage, and may include ground facilities such as parking lots for vehicles and boat trailers.

Table 7.2.16 lists the Pollutant-generating Activities potentially associated with marinas, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs associated with individual facilities vary depending on their actual uses and operations, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.2.16 – Pollutant-generating Activities and Associated Pollutants of Concern for Marinas**

Priority PGA (◆)	PGA Reference Number (see Attachment 6.X)	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)

**Attachment 7.3 – BMP Requirements and Options for  
Commercial and Industrial Sources**  
Updated June 30, 2010

**Attachment 7.3 – BMP Requirements and Options for Commercial and Industrial Sources, Including Proposed Revision to the Watershed Protection Ordinance**

- A. Key Definitions**
- B. Watershed Protection Ordinance (WPO) Excerpts Applicable to Commercial and Industrial Sources**
- C. BMP Requirements and Options for Specific Commercial and Industrial Pollutant-generating Activities (PGAs)**

## **A. Key Definitions**

---

“Best management practices” (BMPs) shall have the same meaning as defined in California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758, Attachment C. Best management practices may include any type of pollution prevention and pollution control measure that achieves compliance with this chapter.

“Business activity” has the same meaning as those activities or facilities listed in section D.3.b.1 of the California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758; and also means airplane mechanical repair, maintenance, fueling, or cleaning; motor vehicle (or other vehicle) parking lots and storage facilities; motor vehicle and other vehicle body repair or painting; motor vehicle mechanical repair, maintenance, fueling, or cleaning; boat mechanical repair, maintenance, fueling, or cleaning; botanical or zoological gardens and exhibits; cement mixing or cutting; cemeteries; food facilities, including, but not limited to, restaurants, taverns, markets, booths, mobile vendors, and commissaries; equipment repair, maintenance, fueling, or cleaning; golf courses, parks and other recreational facilities; landscaping; marinas; masonry storage or installation; mobile motor vehicle or other vehicle washing; mobile carpet, drape or furniture cleaning; nurseries and greenhouses; painting and coating; pest control services; pool, spa, and fountain cleaning; portable sanitary toilet servicing; retail or wholesale fueling; animal facilities; building material retail, wholesale, and storage; power washing services; and also means a facility that is involved in manufacturing; oil and gas mining; hazardous waste treatment, storage, or disposal; solid waste disposal (landfills, land application sites, and open dumps); recycling facilities; steam electric-generation; transportation; sewage or wastewater treatment; or is subject to stormwater effluent limitations guidelines, new source performance standards, or toxic Pollutant effluent standards (40 Code of Federal Regulations Subchapter N), as described in the statewide General Industrial Permit (Water Quality Order No. 97-03-DWQ); and also means any commercial, industrial, or institutional use, as described in the County of San Diego Zoning Ordinance, notwithstanding the zone in which the activity or facility is located.

“Discharge”, when used as a verb, means to allow or cause to allow pollutants to directly or indirectly enter into the stormwater conveyance system or receiving waters. When used as a noun, “discharge” means the pollutants, stormwater or non-stormwater that are discharged.

“Discharger” means any person or entity engaged in activities or operations or owning facilities, which will or may result in pollutants entering stormwater, the stormwater conveyance system, or receiving waters or the owners of real property on which such activities, operations or facilities are located, except that a local government is not a discharger as to activities conducted by others in public rights of way.

“Environmentally sensitive area” (ESA) means impaired water bodies as defined by the federal Clean Water Act, section 303(d), areas designated as areas of special biological significance or with the rare beneficial use by the State Water Resources Control Board in the Water Quality Control Plan for the San Diego Basin (1994 and amendments), areas designated as preserves for species-protection purposes by the State of California or a local government, and pre-approved mitigation areas identified in agreements between the County and state or federal natural resources agencies.

“Feasible” means capable of being accomplished in a successful manner within a reasonable period of time, taking into account economic, environmental, and technological factors as determined in the sole discretion of the County.

“Illicit connection” means a pipe, facility, or other device connected to the stormwater conveyance system or receiving waters, which has not been authorized by the County; or a permitted/authorized pipe, facility, or other device, which conveys unauthorized discharges.

“Maximum extent practicable” (MEP) shall have the same meaning as defined in California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758, Attachment C.

“Non-stormwater” shall have the same meaning as defined in California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758, Attachment C.

“Pollutant” means any agent introduced to stormwater or non-stormwater through human activity that may cause, potentially cause, or contribute to the degradation of water quality such that public health, the environment, or beneficial uses of waters may be affected. The term includes dredged spoil, rock, sand, or silt, excluding sediment, silt, or substances in quantities which would enter stormwater from a natural undeveloped watershed; solid waste, sewage, garbage, or medical waste; green waste; construction debris, concrete asphalt or concrete cement waste; pool backwash and filter media; wrecked, retired or discarded equipment; radioactive materials; industrial waste; fecal coliform, fecal streptococcus, and enterococcus bacteria and other pathogens that pose a threat to human health; volatile organic carbon, surfactants, oil and grease, petroleum hydrocarbons, total organic carbon, lead, copper, chromium, cadmium, silver, nickel, zinc, cyanides, phenols, and biocides; and any contaminant which can significantly degrade the quality of receiving waters by altering pH, total suspended solids or solids capable of settling, biochemical oxygen demand, chemical oxygen demand, nutrients, or temperature.

“Pollution prevention” means the practices and processes that reduce or eliminate the generation of pollutants such as the use of smaller quantities of toxic materials or substitution of less toxic materials; changes to production processes to reduce waste; decreases in waste water flows; recycling of wastes as part of the production process; segregation of wastes, and treatment of wastes on site to decrease volume or toxicity.

“Receiving waters” shall mean waters of the state as defined in California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758, Attachment C.

“Stormwater conveyance system” means private and public drainage facilities other than sanitary sewers within the unincorporated area of San Diego County by which urban run-off is conveyed to receiving waters, and includes but is not limited to roads, streets, constructed channels, aqueducts, storm drains, pipes, street gutters, inlets to storm drains or pipes, or catch basins.

“Stormwater management” means the use of structural (treatment control) or non-structural (source control) BMPs that are designed to reduce urban run-off pollutant loads, discharge volumes, and/or peak discharge flow rates or velocities. When applied to the County or another municipality, stormwater management also includes planning and programmatic measures.

“Stormwater management plan” means a plan, submitted on a County form or in a County approved format with an application for a County permit or other County approval, identifying the measures that will be used for stormwater and non-stormwater management during the permitted activity.

“Stormwater pollution prevention plan” (SWPPP) means an approved site-specific plan that (1) identifies and evaluates sources of pollutants associated with activities that may affect the quality of stormwater discharges and authorized non-stormwater discharges from a facility or site, and (2) identifies and implements site-specific BMPs to reduce to the MEP or to prevent pollutants in stormwater or authorized non-stormwater discharges.

“Tributary to an impaired water body” means a facility or activity is tributary to an impaired water body if urban runoff from that facility or activity enters (1) the stormwater conveyance system at a place and in a manner that will carry pollutants for which that water body is impaired in that discharge to the impaired water body; (2) a flowing stream that will carry pollutants for which that water body is impaired in that discharge to the impaired water body; or (3) an ephemeral stream that reaches the impaired water body during storm events and that will carry pollutants for which that water body is impaired from the facility or activity to the impaired water body during such storm events.

**Proposed Revision:**

**Add:**

**“Wastewater” means all wash water, rinse water (“rinsate”), gray water, and process water discharge except for sewage.**

“Water quality standards” shall have the same meaning as defined in California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758, Attachment C.

## **B. Watershed Protection Ordinance (WPO) Excerpts Applicable to Commercial and Industrial Sources**

---

Key sections of the Watershed Protection Ordinance (WPO) with applicability to Commercial and Industrial Dischargers are provided below. The WPO is provided in its entirety in Attachment 2.2.

### **Sec. 67.804. Discharge Prohibitions.**

(a) It is unlawful for any person to discharge or cause the discharge of pollutants directly or indirectly into the stormwater conveyance system or receiving waters, except as set forth in section 67.805 or as otherwise authorized by law.

(b) It is unlawful for any person to construct, use or maintain a connection to the stormwater conveyance system that discharges any matter other than stormwater, except as set forth in section 67.805(a). This section expressly supersedes any previously issued permit or authorization granted by the County and expressly prohibits any previously legal non-conforming connection.

(c) It is unlawful to throw, deposit, leave, abandon, maintain, or keep materials or wastes on public or private lands in a manner and place where they may result in a discharge.

(d) Stormwater discharges from the site may not contain sediments in amounts in excess of the sediments that would have been discharged from the site in an undisturbed condition.

### **Sec. 67.805. Exemptions from Discharge Prohibitions.**

The following are exempt from the prohibitions in section 67.804:

(a) Any discharge or connection regulated under a valid facility-specific NPDES permit or facility-specific Regional Water Quality Control Board Waste Discharge Requirements permit, not including a state General permit, provided that the Discharge or connection is in compliance with all relevant permit conditions to the satisfaction of the Regional Water Quality Control Board.

(b) Stormwater discharges regulated under the State General Industrial Stormwater Permit or State General Construction Stormwater permit, are exempt from discharge prohibitions established by this chapter, provided that the discharger is in compliance with all relevant general permit conditions to the satisfaction of the Regional Water Quality Control Board.

(c) Non-stormwater agricultural discharges that the State Water Resources Control Board or Regional Water Quality Control Board explicitly allows pursuant to a written waiver, waste discharge requirement, or formal policy, provided that the discharger can demonstrate compliance with all relevant permit, waiver or policy conditions to the satisfaction of the State Water Resources Control Board or Regional Water Quality Control Board.

(d) Except as described in section 67.806(g), the following categories of non-stormwater discharges, if the discharger installs, implements and maintains BMPs or other appropriate action to reduce the discharge of pollutants to the MEP using the best available technology and if the discharge does not degrade the stormwater conveyance system:

- (1) Diverted stream flows, provided required permits are obtained.
  - (2) Flows from riparian habitats and wetlands.
  - (3) Foundation drains, not including active groundwater dewatering systems.
  - (4) Individual residential washing of vehicles.
  - (5) Irrigation water including recycled water used for irrigation.
  - (6) Landscape irrigation.
  - (7) Lawn watering.
  - (8) Rising groundwater.
  - (9) Swimming pool, spa, or fountain discharges (if the disinfectant concentration is reduced to 0.0 ppm chlorine or bromine and the pH adjusted to 7.2 - 8.0 pH) excluding filter backwash, acid wash, and algicide-treated other process water discharges.
  - (10) Uncontaminated ground water infiltration to storm drains.
  - (11) Uncontaminated pumped ground water.
  - (12) Water from crawl space pumps.
  - (13) Water from footing drains, not including active groundwater dewatering systems.
  - (14) Springs.
  - (15) Air conditioning condensation.
  - (16) County pre-approved diversions of potable water as part of utility line maintenance, provided that the discharge does not cause erosion or contain sediment or other pollutants.
  - (17) Discharges from potable water sources not subject to NPDES Permit No. CAG679001, other than water main breaks.
- (e) Exemptions to protect public health and safety. Discharges of trauma scene post-cleanup residues, and other discharges provided that it is in conformance with the California RWQCB's Conditional Waiver of Waste Discharge Requirements, Resolution No. R9-2007-0104, adopted October 10, 2007.
- (f) Any discharge category described in section 67.805(d) that the authorized enforcement official determines is a significant source of pollutant to waters of the United States shall be prohibited from entering the stormwater conveyance system or receiving waters, or the discharger shall implement additional BMPs to reduce pollutants in that discharge to the MEP, using the best available technology.

(1) The authorized enforcement official may issue a written notice to the discharger imposing a schedule to cease the discharge or implement the additional BMPs.

(2) The schedule may take into account the nature and severity of any effects caused by the discharge and the time required to design, engineer, fund, procure, construct and make appropriate BMPs or interim BMPs operational.

#### **Sec. 67.806. General Best Management Practice Requirements**

The following requirements apply to all dischargers:

(a) All dischargers must perform and maintain the following BMPs:

(1) Prior to the rainy season, remove or secure any significant accumulations of eroded soils from slopes previously disturbed by landscaping, clearing or grading, if those eroded soils could otherwise enter and impact the stormwater conveyance system or receiving waters during the rainy season.

(2) Implement, as practicable, those stormwater pollution prevention practices that are generally recognized in that discharger's industry or business as being effective and economically advantageous.

(3) Eliminate illicit connections.

(4) Protect, from erosion, those slopes that have been disturbed by clearing, grading, or landscaping and are more than three feet in height or steeper than 3:1 (run-to-rise). Slope protection shall occur prior to the first rainy season following the clearing, grading or landscaping of the slope and continuously thereafter.

(5) Store all materials and wastes with the potential to pollute stormwater in a manner that either prevents contact with rainfall and runoff from storm flows or contains contaminated runoff for treatment and disposal.

(6) Locate, configure, and manage stockpiles of soil, green waste and compost to prevent the release of materials to the stormwater conveyance system or receiving waters.

(7) Use all materials with the potential to pollute runoff, such as outdoor cleaning and maintenance products, fertilizers, pesticides and herbicides in accordance with label directions. No such product may be disposed of or rinsed into receiving waters or the stormwater conveyance system.

(8) Use dry methods such as sweeping, vacuuming, raking, and application of absorbents to cleanup Pollutants, unless wet cleanup methods are otherwise allowed in this Chapter.

(b) All applications to the County for a permit or approval associated with a development project must be accompanied by a stormwater management plan on a form or in a format specified by the County. The plan shall describe the manner in which the BMPs required by this chapter will be implemented.

(c) After construction is completed, all development projects with the potential to add pollutants to stormwater or to affect the flow rate or velocity of stormwater runoff shall employ

the following post-construction BMPs, where feasible, to ensure that pollutants and runoff from the development will be reduced to the MEP and will not significantly degrade receiving water quality:

(1) Source control BMPs. Source control BMPs include storm drain system stenciling and posting of signs; posting of signs or other form of notification at storm drain inlets and access points to creeks and channels discouraging illegal dumping and stating the receiving water by name; properly designed outdoor material storage areas; properly designed trash storage areas; and implementation of efficient irrigation systems.

(2) LID BMPs. LID BMPs shall maximize infiltration, provide retention, slow runoff, minimize impervious footprint and constructed widths and direct runoff from impervious areas into landscaping.

(3) Buffer zones. A project shall be designed to include a buffer zone for natural water bodies. Where buffer zones are not feasible, other equally serving methods may be implemented such as trees or access restrictions.

(4) Construction BMPs. Implement land disturbance BMPs described in section 67.811.

(5) Maintenance agreement.

(d) BMPs at construction facilities shall be inspected by the discharger before and following predicted rain events.

(e) BMPs shall be maintained to function as intended and designed. BMPs which fail shall be repaired or replaced as soon as it is safe or practicable. If BMPs fail notwithstanding their intent or design, the BMPs shall be modified or upgraded to prevent any further failure in the same or similar circumstances.

(f) Stormwater Pollution Prevention Plan (SWPPP). Notwithstanding the provisions of this chapter, an authorized enforcement official may require a discharger to prepare and submit a SWPPP for approval by the authorized enforcement official as follows:

(1) If the discharger fails to comply with any applicable requirement of this chapter after one or more written notifications or other enforcement action because BMPs have been determined to be inadequate or are not being adequately maintained.

(2) The activity at issue is considered a significant source of contaminants to the stormwater conveyance system or receiving waters despite compliance with this chapter. Any discharger required to submit and to obtain approval of a SWPPP shall install, implement and maintain the BMPs specified in the approved SWPPP at all times.

(3) The SWPPP shall identify the BMPs or corrective measures that will be used by the discharger to prevent or control pollution of stormwater to the MEP. If the facility operates under the State NPDES General Industrial Stormwater permit, the SWPPP submitted to the County shall at a minimum meet the requirements of that permit. If the activity at issue is a construction or land disturbance activity, the SWPPP submitted to the County, shall at a minimum, meet the requirements of the State NPDES General Construction Stormwater permit. If a facility discharges non-stormwater to ground water, the facility shall obtain an RWQCB permit as

required by the State Water Code, and shall describe the requirements of that permit in the SWPPP.

(g) Notification of spills, releases and illicit discharges.

(1) Spills, releases, or discharges of pollutants to receiving waters or to the stormwater conveyance system shall be reported by the discharger as required by all applicable state and federal laws.

(2) Any spills, releases or discharges with the potential to endanger health, safety or the environment shall be reported to the Director or Assistant Director, Department of Public Works, within 24 hours after discovery of the spill, release or discharge. Spills that have been completely contained and cleaned up on-site are not considered significant unless they pose a threat to human health or safety.

(3) If safe to do so, necessary actions shall be taken to contain and minimize the spill, release or discharge to the MEP.

(h) Sampling, testing, monitoring, and reporting.

(1) Dischargers shall perform the sampling, testing, monitoring and reporting required by this chapter.

(2) An authorized enforcement official may order a discharger to conduct testing or monitoring and to report the results to the County if one or more of the following occurs:

(A) The authorized enforcement official determines that testing or monitoring is needed to determine whether BMPs are effectively preventing or reducing pollution in stormwater to the MEP.

(B) Testing or monitoring is needed to determine whether the facility is a significant source of contaminants to receiving waters.

(C) The authorized enforcement official determines that testing or monitoring is needed to assess the impacts of a discharge on the public's health or safety or the environment.

(D) A discharge has not been eliminated after written notice by an authorized enforcement official.

(E) The RWQCB requires the County to provide any information related to the discharger's activities.

(3) Sampling, testing, or monitoring ordered pursuant to section 67.807(i)(2) may include one or more of the following:

(A) Visual monitoring of dry weather flows, wet weather erosion, discharge points, or condition of BMPs.

(B) Visual monitoring of premises for spills or discharges.

(C) Laboratory analyses of stormwater or non-stormwater discharges for pollutants.

(D) Background or baseline monitoring or analysis.

(E) Monitoring of receiving waters or sediments that may be affected by pollutant discharges by the discharger or by a group of dischargers including the discharger.

(4) The authorized enforcement official may direct the manner in which the results of required testing and monitoring are reported, and may determine that sampling, testing or monitoring may discontinue.

**Sec. 67.808. Additional Minimum Best Management Practice Requirements for Business Activities**

The following requirements apply to all business activities:

(a) The owner or operator shall install, implement, and maintain BMPs appropriate to the activity, as specified in the following areas and manner:

(1) Stormwater BMP training and documentation.

(A) Provide training at least annually to all operators, employees, and workers with responsibility for activities that could result in unauthorized discharges.

(B) Maintain, on site, documented evidence of training and provide the documentation upon request of the authorized enforcement official.

(C) The following categories shall be included in training and documentation:

- i. Preventive maintenance.
- ii. Good housekeeping.
- iii. Proper waste disposal.
- iv. Non-stormwater disposal alternatives.
- v. Equipment/vehicle maintenance and repair.
- vi. Spill response, containment, and recovery.
- vii. Recycling.
- viii. BMP maintenance.

(2) Where required to implement a SWPPP, retain on site, a copy of a current, complete, site-specific SWPPP and make it available for review by the authorized enforcement official, upon request.

(3) Signage.

(A) Post signs prohibiting discharges to the stormwater conveyance system or receiving waters, when required by the authorized enforcement official.

(B) Signs requiring use of the concrete washout facilities shall be installed adjacent to each concrete washout facility.

(4) Review the operations and procedures relating to protecting the stormwater conveyance system and receiving waters from pollutants at least annually. Maintain, on site,

documented evidence of the annual review, and provide the documentation of the authorized enforcement official upon request.

(5) Implement pollution prevention methods or those stormwater pollution prevention practices that are generally recognized in that discharger's industry or business to eliminate or reduce pollutants in runoff to the MEP.

(6) Housekeeping.

(A) The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.

(B) Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.

(7) Liquid waste management

(A) Wet cleanup methods such as hosing, steaming or pressure washing is prohibited except where adequate precautions have been taken to prevent the discharge of wash water or other pollutants into the stormwater conveyance system or receiving waters. Adequate measure may include filtering all pollutants from the water prior to discharge.

(B) Cleaning by using wet methods such as hosing, steam-cleaning, pressure-washing, is prohibited unless adequate precautions have been taken to prevent the entry of wash water and other contaminants into the stormwater conveyance system or receiving waters.

(C) Disposal of slurries to the stormwater conveyance system or receiving waters is prohibited.

(D) Rinse water shall be confined to a designated area such as a sanitary sewer, dead-end sump, process treatment system, or hole where water percolates or evaporates and solids are removed for collection and disposal. Rinse water and solids shall be re-used, recycled, or disposed of in accordance with this chapter.

(E) Wash water shall be directed to an approved sanitary sewer or landscaped locations.

(F) Wash racks.

i. Wash rack areas shall have perimeter control and be properly sloped to a grated floor drain.

ii. Wash rack areas shall drain to the sanitary sewer or to a holding tank.

(G) Disposal of wastewater to the stormwater conveyance system, receiving waters, or the ground, is prohibited.

(H) If provided, pump-out services for boats, portable toilets, or other holding tanks shall be conducted in a manner that prevents the release of sewage to the stormwater conveyance system or receiving waters.

(I) Wastewater shall be disposed to the sanitary sewer at the job site or to a holding tank. Disposal of wastewater contained in holding tanks shall be disposed of to the sanitary sewer at the business's company headquarters or at an approved location.

(J) Discharging backwash wastewater to the stormwater conveyance system or receiving waters is prohibited. Backwash wastewater may be disposed to the sanitary sewer; to a holding tank or settling pond; or where allowed by this chapter, by infiltration to the soil.

(K) Pool, spa, and fountain water intended for discharge to the stormwater conveyance system shall contain a concentration of zero ppm chlorine or bromine prior to discharge.

(L) Pool, spa, and fountain water discharged after acid washing shall be neutralized to a pH of 7.2 - 8.0.

(M) If rinse water from the cleaning of portable sanitary toilet closets cannot be properly disposed of to the sanitary sewer at a job site, it shall be contained prior to disposal at the service facility or other approved facility.

(N) Wash and rinse water from building and pavement washing that cannot be properly disposed of at the job site shall be collected and contained for recycling, reuse, or proper disposal.

(O) Where irrigation tail-water return ponds are used, the ponds shall be designed with the appropriate vertical separation between the base of the pond and the seasonal high groundwater mark and must be lined or managed to prevent the movement of water-soluble chemicals to the groundwater and to stormwater flows.

(8) Materials and waste management.

(A) Spill prevention and response.

i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.

ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.

iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.

(B) Hazardous materials and hazardous wastes.

i. Hazardous materials and wastes shall be stored, managed, and disposed in accordance with applicable federal, state and local laws and regulations.

ii. Hazardous materials and wastes shall be stored above the ground. Where practicable, provide overhead coverage for all outside hazardous materials or waste storage areas. If overhead coverage is not available, stored materials shall be covered with an impervious material such as a tarp or other similar method.

iii. Paints, coatings, thinners, and other materials shall be disposed of in accordance with this chapter.

iv. Secondary containment of hazardous waste shall be provided around storage areas from which a significant potential exists to discharge materials or wastes to the stormwater conveyance system or receiving waters.

v. Hazardous waste storage areas shall be inspected by the owner or operator, at least once prior to the rainy season and monthly during the rainy season.

vi. Pesticides and other chemical products shall be used, stored, and disposed of in accordance with applicable federal, state, and local laws and regulations.

vii. The outdoor application of fertilizers and pesticides is prohibited during rainfall.

viii. Pesticide use shall be reduced to the MEP in areas where recurring applications of pesticides are performed.

(C) Solid, non-hazardous waste.

i. Trash storage and disposal areas shall be kept clean and free of debris.

ii. Dumpsters, grease bins, and other containers shall be maintained in a clean and leak proof condition and shall be kept securely closed when not in use.

**Proposed Revision:**

**Add: “grease traps and interceptors” to (C)ii.**

iii. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.

iv. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.

v. All areas where livestock, horses or other large animals are confined shall be bermed or curbed in a manner that avoids a discharge to the stormwater conveyance system or receiving water. If berms or curbs are not practicable, manure shall be cleaned up at least twice weekly and must be composted or properly stored prior to disposal.

(D) Loading and unloading.

i. Storm drain inlets located within or down-gradient of loading or unloading areas shall be covered or otherwise protected during loading and unloading activities to prevent the entry of pollutants into the stormwater conveyance system or receiving waters.

ii. Equipment and supplies stored in loading and unloading areas shall be properly maintained to prevent leaks and spills to the stormwater conveyance system or receiving waters, and to prevent their contact with rainfall and run-on.

(E) Storage.

i. Outdoor storage areas of materials and equipment shall be configured using berms, dikes, or other diversion structures or other measures that elevate stored materials and equipment from site surfaces.

ii. Containers shall be kept in a leak-proof condition, securely closed when not in use, and stored in a manner that protects them from contact with stormwater.

iii. Storage of cement and masonry materials shall be above ground and covered.

iv. Placement of stock piles within any drainage system is prohibited.

v. Stockpiles and bulk materials, such as soil, fertilizer, and potting mixture shall be covered during windy and rainy conditions where practicable. Prior to the onset of predicted rain, stockpiles shall be covered and bermed to prevent contact with stormwater.

(9) Vehicles and equipment.

(A) All vehicles and equipment shall be properly maintained and inspected to ensure their proper functioning.

(B) Vehicles and equipment shall not be washed in areas where wash water or rinse water will drain to the stormwater conveyance system or receiving waters.

(C) Infiltration of wash or rinse water to pervious surfaces is allowed with a minimum of 10 feet separation between the groundwater and the pervious surface, except that wash or rinse water generated from cleaning engines, mechanical parts, or heavy equipment shall not infiltrate a pervious surface.

(D) The use of hose-off or single-use engine degreasing chemicals is prohibited, unless captured and properly disposed.

(E) Maintenance and repair equipment shall be kept clean to avoid the build up of grease and oil.

(F) Fluids shall be drained from any retired vehicles or equipment stored on site.

(G) Vehicle and equipment maintenance and repair work such as body work shall be conducted indoors or under cover, where practicable. If work cannot be conducted indoors or under cover, other BMPs shall be implemented to prevent the discharge of pollutants into the stormwater conveyance system or receiving waters.

(H) Major repair and maintenance work on boats over or in the water is prohibited. Touch-up painting, tune ups, or other similar activities are not considered major repair or maintenance work, but may only be conducted over or in the water if adequate precautions have been taken to prevent the entry of pollutants into the water.

(10) Outdoor areas--housekeeping and grounds keeping practices.

(A) Storm drain inlets located within or down gradient of the activity shall be covered or otherwise protected from the entry of pollutants during hours of operation.

(B) Landscaping and grounds keeping.

i. Exposed slopes shall be stabilized as soon as possible.

ii. Paved surfaces such as sidewalks shall be cleaned regularly using dry clean-up methods such as sweeping or vacuuming. Hosing is permissible only after surfaces have previously been cleaned using dry methods, and only if precautions have been taken to prevent the discharge of runoff to the storm drain.

(C) Parking lots and vehicle storage areas.

i. Wet clean-up methods may only be used where adequate precautions have been taken to prevent the entry of wash water and other contaminants into the stormwater conveyance system or receiving waters.

ii. Vehicle maintenance and repair operations with the potential to release pollutants are prohibited at commercial parking lots and storage facilities.

(D) Rooftops.

i. Materials which may contaminate stormwater shall not be stored on rooftops unless adequate precautions have been taken to prevent their contact with stormwater.

ii. Equipment such as emergency generators, HVAC systems and other similar items located on rooftops shall be inspected and preventive maintenance conducted to prevent leaks and spills.

iii. Substances such as bird droppings, grease, leaves, that have accumulated on rooftops shall be removed, as practicable, to prevent or reduce the discharge of contaminants directly or indirectly to the stormwater conveyance system or receiving waters.

iv. Where feasible, roof downspouts shall be routed away from work areas and toward pervious areas such as lawns, except where required under section 67.812.

(b) Other requirements

(1) Any business activity operating under the statewide General Industrial permit shall provide the following documents for on-site review by the authorized enforcement official:

(A) The Notice of Intent letter or a Waste Discharge Identification Number issued by the SWRCB;

(B) A SWPPP satisfying the requirements of the General Industrial permit;

(C) A monitoring program satisfying the requirements of the General Industrial permit; and

(D) Training records satisfying the requirements of the General Industrial permit.

(2) Any business activity identified in section D.3.b.1(c) of the California Regional Water Quality Control Board, San Diego Region Order No. R9-2007-0001, NPDES No. CAS0108758 and is tributary to an impaired water body segment or ESA, as defined in Section 303(d) of the Clean Water Act, shall perform the following:

(A) Prepare and submit, a SWPPP, for approval.

(B) Prepare and submit, for approval, a site-specific spill response plan that describes the areas where spills are likely to occur, the location of on-site storm drains and discharge points, the type and location of spill-response materials to be used, and the person(s) responsible for spill containment and cleanup.

(C) Install, implement, and maintain the additional BMPs in accordance with the approved SWPPP.

(D) Conduct sampling, testing, monitoring, and reporting as described in section 67.807(i).

**Proposed Revision:**

**Replace (2)(A), (B), (C) and (D) with the following text.**  
as applicable:

(A) Include in the annual employee training and documentation, awareness of the environmentally sensitive area and the additional importance of minimizing discharges from the facility;

(B) Include in the annual employee training and documentation, awareness of the CWA 303(d) impaired water body and the associated pollutant(s) of concern generated by the facility;

(C) Prepare and maintain a site-specific spill response plan that describes the areas where spills are likely to occur, the location of on-site storm drains and discharge points, the type and location of spill-response materials to be used, and the person(s) responsible for spill containment and cleanup; and

(D) Implement structural controls as directed by the authorized enforcement official. Such controls may include signage on private storm drains, drainage inserts in private storm drains, berm construction, and overhead coverage (in accordance with zoning and building codes).

## C. BMP Requirements and Options for Specific Commercial and Industrial Pollutant-generating Activities (PGAs)

**Table 7.3.1 – Required and Optional Best Management Practices (BMPs) by Pollutant-generating Activity**

<i>Category A: Management of Materials , Equipment, and Wastes</i>	
<b>A.1 MATERIALS MANAGEMENT</b>	
<b>A.1.a Materials Loading and Unloading</b>	<p><u>WPO Section 67.808(a)(6)(a) – Use dry clean-up methods</u></p> <p>8. Use dry methods such as sweeping, vacuuming, raking, and application of absorbents to cleanup Pollutants, unless wet cleanup methods are otherwise allowed in this Chapter.</p> <p><u>WPO Section 67.808(a)(8)(A) – Spill prevention and response</u></p> <p>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</p> <p>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p> <p><u>WPO Section 67.808(a)(8)(D) -- Loading and unloading</u></p> <p>i. Storm drain inlets located within or down-gradient of loading or unloading areas shall be covered or otherwise protected during loading and unloading activities to prevent the entry of pollutants into the stormwater conveyance system or receiving waters.</p> <p>ii. Equipment and supplies stored in loading and unloading areas shall be properly maintained to prevent leaks and spills to the stormwater conveyance system or receiving waters, and to prevent their contact with rainfall and run-on.</p>
	<p><u>Stormwater Standards Manual</u></p> <p><b>Section C.2.6.3:</b> The following conditions apply to the loading and unloading of significant materials at Regulated Commercial Facilities:</p> <p>(a) Where practicable, loading / unloading of materials shall only be allowed in designated areas.</p> <p>(b) Spills and leaks shall be promptly cleaned up and the generated wastes disposed of properly.</p> <p>(c) Loading / unloading areas shall be periodically inspected, and accumulations of debris, litter, waste, or other materials removed.</p> <p>(d) Materials and equipment necessary for spill response shall be maintained and kept readily accessible and all employees conducting loading / unloading activities trained in their proper use.</p> <p>(e) Significant spills shall be reported promptly to the County's Stormwater Hotline. Significant spills are those which discharge, or have the potential to discharge, contaminants directly or indirectly to the Stormwater Conveyance System or Receiving Waters. Spills of hazardous materials shall be reported to the County's Complaint Hotline. Spills that have been completely contained and cleaned up on-site are not considered significant unless they pose a threat to human health or safety.</p>

	<p><b>Section C.3.1.3:</b> In addition to the requirements of section 2.6.3, the following conditions apply to the loading and unloading of significant materials at High Priority Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) Designated loading / unloading areas shall be regularly cleaned using dry methods (e.g., sweeping, vacuuming, etc.).</li> <li>(b) Wet cleaning (hosing, pressure washing, etc.) of loading / unloading areas shall only be allowed if adequate precautions have been taken to prevent the discharge of wash water into the Stormwater Conveyance System or Receiving Waters, or to filter pollutants from the water prior to discharge.</li> <li>(c) Storm drain inlets located within or down gradient of loading / unloading areas shall be covered or otherwise protected during loading / unloading activities to prevent the entry of materials.</li> <li>(d) Loading / unloading equipment (forklifts, pallet jacks, etc.) shall be maintained in good condition, and preventive maintenance conducted as necessary to prevent leaks.</li> <li>(e) Equipment and supplies stored in loading / unloading areas shall be properly maintained to prevent leaks and spills to the Stormwater Conveyance System or Receiving Waters, and to prevent their contact with rainfall and run-on.</li> </ul>
<p><b>A.1.b Storage of Materials</b></p> <p><b>A.1.c Liquid Container Storage</b></p>	<p><u>WPO Section 67.806(a) – General BMP Requirements</u></p> <ul style="list-style-type: none"> <li>(5) Store all materials and wastes with the potential to pollute stormwater in a manner that either prevents contact with rainfall and runoff from storm flows or contains contaminated runoff for treatment and disposal.</li> <li>(6) Locate, configure, and manage stockpiles of soil, green waste and compost to prevent the release of materials to the stormwater conveyance system or receiving waters.</li> </ul> <p><u>WPO Section 67.808(a)(8)(A) – Spill prevention and response</u></p> <ul style="list-style-type: none"> <li>i. Trash storage and disposal areas shall be kept clean and free of debris.</li> <li>ii. Dumpsters, grease bins, and other containers shall be maintained in a clean and leak proof condition and shall be kept securely closed when not in use.</li> <li>iii. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.</li> <li>iv. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.</li> </ul> <p><u>WPO Section 67.808(a)(8)(E) – Storage</u></p> <ul style="list-style-type: none"> <li>i. Outdoor storage areas of materials and equipment shall be configured using berms, dikes, or other diversion structures or other measures that elevate stored materials and equipment from site surfaces.</li> <li>ii. Containers shall be kept in a leak-proof condition, securely closed when not in use, and stored in a manner that protects them from contact with stormwater.</li> </ul>

	<p><u>Stormwater Standards Manual</u></p> <p><b>Section C.2.6.2:</b> The following conditions apply to the storage of solid waste at Regulated Commercial Facilities:</p> <ul style="list-style-type: none"> <li>a. Trash storage and disposal areas shall be kept clean and free of debris.</li> <li>b. Dumpsters and other containers shall be maintained in good condition, and shall be kept securely closed when not in use.</li> <li>c. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.</li> </ul> <p><b>Section C.3.1.2:</b> In addition to the requirements of Section 2.6.2, the following condition applies to the storage of solid waste at High Priority Commercial Facilities:</p> <ul style="list-style-type: none"> <li>a. Trash storage and disposal areas shall be inspected at least weekly.</li> <li>b. Wet cleaning (hosing, pressure washing, etc.) of trash storage and disposal areas shall only be allowed if adequate precautions have been taken to prevent the discharge of wash water into the Stormwater Conveyance System or Receiving Waters.</li> <li>c. Inspection results shall be documented in writing and records of inspections shall be retained on site for two years.</li> </ul>
<b>A.3.d Pet Waste / Manure</b>	<p><u>WPO Section 67.808(a)(8) (C) -- Solid, non-hazardous waste</u></p> <ul style="list-style-type: none"> <li>i. Trash storage and disposal areas shall be kept clean and free of debris.</li> <li>ii. Dumpsters, grease bins, and other containers shall be maintained in a clean and leak proof condition and shall be kept securely closed when not in use.</li> <li>iii. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.</li> <li>v. All areas where livestock, horses or other large animals are confined shall be bermed or curbed in a manner that avoids a discharge to the stormwater conveyance system or receiving water. If berms or curbs are not practicable, manure shall be cleaned up at least twice weekly and must be composted or properly stored prior to disposal.</li> </ul> <p><u>WPO Section 67.808(a)(8)(E) – Storage</u></p> <ul style="list-style-type: none"> <li>ii. Containers shall be kept in a leak-proof condition, securely closed when not in use, and stored in a manner that protects them from contact with stormwater.</li> <li>iv. Placement of stock piles within any drainage system is prohibited.</li> <li>v. Stockpiles and bulk materials, such as soil, fertilizer, and potting mixture shall be covered during windy and rainy conditions where practicable. Prior to the onset of predicted rain, stockpiles shall be covered and bermed to prevent contact with stormwater.</li> </ul>

**A.3.e Liquid Waste**  
**A.3.f Sanitary Wastes**

WPO Section 67.808(a)(7) -- Liquid waste management

- C. Disposal of slurries to the stormwater conveyance system or receiving waters is prohibited.
- D. Rinse water shall be confined to a designated area such as a sanitary sewer, dead-end sump, process treatment system, or hole where water percolates or evaporates and solids are removed for collection and disposal. Rinse water and solids shall be re-used, recycled, or disposed of in accordance with this chapter.
- E. Wash water shall be directed to an approved sanitary sewer or landscaped locations.
- F. Wash racks.
  - i. Wash rack areas shall have perimeter control and be properly sloped to a grated floor drain.
  - ii. Wash rack areas shall drain to the sanitary sewer or to a holding tank.
- G. Disposal of wastewater to the stormwater conveyance system, receiving waters, or the ground, is prohibited.
- H. If provided, pump-out services for boats, portable toilets, or other holding tanks shall be conducted in a manner that prevents the release of sewage to the stormwater conveyance system or receiving waters.
- I. Wastewater shall be disposed to the sanitary sewer at the job site or to a holding tank. Disposal of wastewater contained in holding tanks shall be disposed of to the sanitary sewer at the business's company headquarters or at an approved location.
- J. Discharging backwash wastewater to the stormwater conveyance system or receiving waters is prohibited. Backwash wastewater may be disposed to the sanitary sewer; to a holding tank or settling pond; or where allowed by this chapter, by infiltration to the soil.
- K. Pool, spa, and fountain water intended for discharge to the stormwater conveyance system shall contain a concentration of zero ppm chlorine or bromine prior to discharge.
- L. Pool, spa, and fountain water discharged after acid washing shall be neutralized to a pH of 7.2 - 8.0.
- M. If rinse water from the cleaning of portable sanitary toilet closets cannot be properly disposed of to the sanitary sewer at a job site, it shall be contained prior to disposal at the service facility or other approved facility.
- N. Wash and rinse water from building and pavement washing that cannot be properly disposed of at the job site shall be collected and contained for recycling, reuse, or proper disposal.
- O. Where irrigation tail-water return ponds are used, the ponds shall be designed with the appropriate vertical separation between the base of the pond and the seasonal high groundwater mark and must be lined or managed to prevent the movement of water-soluble chemicals to the groundwater and to stormwater flows.

WPO Section 67.808(a)(8)(A) – Spill prevention and response

- i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.
- ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.
- iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.

WPO Section 67.808(a)(8)(E) – Storage

- ii. Containers shall be kept in a leak-proof condition, securely closed when not in use, and stored in a manner that protects them from contact with stormwater.

<p><b>A.3.g Green Waste</b></p>	<p><u>WPO Section 67.806(a) – General BMP Requirement</u></p> <p>(6) Locate, configure, and manage stockpiles of soil, green waste and compost to prevent the release of materials to the stormwater conveyance system or receiving waters.</p> <p><u>WPO Section 67.808(a)(8) (C) -- Solid, non-hazardous waste</u></p> <ul style="list-style-type: none"> <li>i. Dumpsters, grease bins, and other containers shall be maintained in a clean and leak proof condition and shall be kept securely closed when not in use.</li> <li>iii. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.</li> <li>iv. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.</li> </ul> <p><u>WPO Section 67.808(a)(8)(E) – Storage</u></p> <ul style="list-style-type: none"> <li>ii. Containers shall be kept in a leak-proof condition, securely closed when not in use, and stored in a manner that protects them from contact with stormwater.</li> </ul>
<p><b>A.3.i Recyclables / Reusables</b></p>	<p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <ul style="list-style-type: none"> <li>N. Wash and rinse water from building and pavement washing that cannot be properly disposed of at the job site shall be collected and contained for recycling, reuse, or proper disposal.</li> </ul> <p><u>WPO Section 67.808(a)(8)(A) – Spill prevention and response</u></p> <ul style="list-style-type: none"> <li>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</li> </ul> <p><u>WPO Section 67.808(a)(8)(E) – Storage</u></p> <ul style="list-style-type: none"> <li>ii. Containers shall be kept in a leak-proof condition, securely closed when not in use, and stored in a manner that protects them from contact with stormwater.</li> </ul>

**Category B: General Operations and Activities**

**B.1 VEHICLE AND EQUIPMENT REPAIR, MAINTENANCE, AND SERVICE**

<b>B.1.a Vehicle and Equipment Repair</b>	<p><u>WPO Section 67.808(a)(6) – Housekeeping.</u></p> <p>A. The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.</p> <p>B. Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.</p> <p><u>WPO Section 67.808(a)(8)(A) – Spill prevention and response</u></p> <p>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</p> <p>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p> <p><u>WPO Section 67.808(a)(9) -- Vehicles and Equipment</u></p> <p>A. All vehicles and equipment shall be properly maintained and inspected to ensure their proper functioning.</p> <p>D. The use of hose-off or single-use engine degreasing chemicals is prohibited, unless captured and properly disposed.</p> <p>E. Maintenance and repair equipment shall be kept clean to avoid the build up of grease and oil.</p> <p>F. Fluids shall be drained from any retired vehicles or equipment stored on site.</p>
<b>B.1.b Changing Vehicle Fluids</b>	<p>G. Vehicle and equipment maintenance and repair work such as body work shall be conducted indoors or under cover, where practicable. If work cannot be conducted indoors or under cover, other BMPs shall be implemented to prevent the discharge of pollutants into the stormwater conveyance system or receiving waters.</p>
<b>B.1.c Parts Replacement and Repairs</b>	<p>H. Major repair and maintenance work on boats over or in the water is prohibited. Touch-up painting, tune ups, or other similar activities are not considered major repair or maintenance work, but may only be conducted over or in the water if adequate precautions have been taken to prevent the entry of pollutants into the water.</p> <p><u>WPO Section 67.808(a)(9) -- Outdoor areas--housekeeping and grounds keeping practices.</u></p> <p>C. Parking lots and vehicle storage areas.</p> <p>ii. Vehicle maintenance and repair operations with the potential to release pollutants are prohibited at commercial parking lots and storage facilities.</p> <p><u>Stormwater Standards Manual</u></p> <p>Section C.2.7.2: The following conditions apply to the maintenance and repair of vehicles and equipment at Regulated Commercial Facilities:</p> <p>(a) Precautions shall be taken to prevent spills and leaks during maintenance and repair activities.</p> <p>(b) Materials and equipment necessary for spill response shall be maintained and kept readily accessible, and staff conducting maintenance and repair activities instructed in their proper use.</p> <p>(c) Significant spills shall be reported promptly to the County's Stormwater Hotline. Significant spills are those which discharge, or have the potential to discharge, contaminants directly or indirectly to the Stormwater Conveyance System or Receiving Waters. Spills of hazardous materials shall be reported to the County's Complaint hotline. Spills which have been completely contained and cleaned up on-site are not considered significant unless they pose a threat to human health or safety.</p>

	<p><u>Stormwater Standards Manual</u></p> <p>Section C.3.2.2: In addition to the requirements of Section 2.7.2, the following conditions apply to the maintenance and repair of vehicles and equipment at High Priority Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) Storm drain inlets located within or downgradient of maintenance and repair areas shall be protected to prevent the entry of spilled fluids (e.g., fuel, oil, grease, or antifreeze).</li> <li>(b) Vehicle and equipment maintenance and repair shall only be conducted in areas where adequate precautions have been taken to prevent the entry of spills into the Stormwater Conveyance System or Receiving Waters. Designated maintenance and repair areas are required where practicable.</li> <li>(c) Maintenance and repair equipment shall be kept clean to avoid the build up of grease and oil.</li> <li>(d) Fluids shall be drained from any retired vehicles or equipment stored on site.</li> <li>(e) Only dry cleaning methods shall be used on maintenance and repair areas unless adequate precautions have been taken to prevent the discharge of wash water to the Stormwater Conveyance System or Receiving Waters (e.g., the discharge is directed to the sanitary sewer, a sump, etc.).</li> <li>(f) Drip pans, containers, or other methods of drip and spill containment shall be utilized at all times during the repair or maintenance of vehicles and equipment.</li> <li>(g) The retrofitting of existing facilities with structural controls such as low-flow sumps or oil/water separators shall be considered to prevent the entry of spills into the stormwater conveyance system or receiving waters. The use of structural controls is not required, but is encouraged where practicable. Pursuant to Ordinance Section 67.804(i), the County may order the use of structural controls.</li> <li>(h) Repair and maintenance work must be conducted indoors or under cover whenever practicable. If this work cannot be conducted indoors or under cover, other precautions must be taken to prevent the discharge of contaminants into the stormwater conveyance system or receiving waters.</li> </ul>
<b>B.2 WASHING AND CLEANING ACTIVITIES</b>	
<p><b>B.2.a Vehicle Washing</b></p> <p><b>B.2.b Equipment Cleaning</b></p>	<p><u>WPO Section 67.808(a)(9) -- Vehicles and Equipment</u></p> <ul style="list-style-type: none"> <li>(B) Vehicles and equipment shall not be washed in areas where wash water or rinse water will drain to the stormwater conveyance system or receiving waters.</li> <li>(C) Infiltration of wash or rinse water to pervious surfaces is allowed with a minimum of 10 feet separation between the groundwater and the pervious surface, except that wash or rinse water generated from cleaning engines, mechanical parts, or heavy equipment shall not infiltrate a pervious surface.</li> <li>(D) The use of hose-off or single-use engine degreasing chemicals is prohibited, unless captured and properly disposed.</li> <li>(E) Maintenance and repair equipment shall be kept clean to avoid the build up of grease and oil.</li> </ul> <p><u>Stormwater Standards Manual</u></p> <p>Section C.2.7.3: The following conditions apply to the washing of vehicles and equipment at Regulated Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) Storm drain inlets located within or down gradient of wash areas shall be covered or otherwise protected to prevent the entry of wash water or rinse water.</li> <li>(b) Where practicable, the introduction of pollutants (soaps, degreasers, etc.) to wash water shall be reduced or eliminated.</li> </ul>

	<p><u>Stormwater Standards Manual</u></p> <p>Section C.3.2.3: In addition to the requirements of Section 2.7.3, the following conditions apply to the washing of vehicles and equipment at High Priority Commercial Facilities:</p> <p>(a) Vehicles and equipment shall only be washed in areas where adequate precautions have been taken to prevent the entry of wash water and other contaminants into the Stormwater Conveyance System or Receiving Waters. Designated wash areas and/or wash racks are required where practicable.</p> <p>(b) Where practicable, wash areas shall drain or be plumbed to the sanitary sewer. Dischargers are responsible for obtaining all necessary approvals from sewerage agencies prior to connecting or discharging to the sewer. In addition, oil/water separators will be installed prior to release into sanitary sewers.</p> <p>(c) Infiltration of wash water or rinse water to pervious surfaces is generally allowed. However, vehicle wash water or rinse water generated from cleaning engines, mechanical parts, or heavy equipment may not be infiltrated. A minimum of ten feet separation between the groundwater and the pervious surface is required.</p> <p>(d) Wash waters or rinse waters not discharged to sewer or infiltrated must be contained for treatment, re-use, or proper disposal.</p>
<b>B.2.c Floors, Mats, and Surfaces</b>	<p><u>WPO Section 67.808(a)(6) -- Housekeeping</u></p> <p>(B) Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.</p> <p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <p>A. Wet cleanup methods such as hosing, steaming or pressure washing is prohibited except where adequate precautions have been taken to prevent the discharge of wash water or other pollutants into the stormwater conveyance system or receiving waters. Adequate measure may include filtering all pollutants from the water prior to discharge.</p> <p>B. Cleaning by using wet methods such as hosing, steam-cleaning, pressure-washing, is prohibited unless adequate precautions have been taken to prevent the entry of wash water and other contaminants into the stormwater conveyance system or receiving waters.</p> <p>C. Disposal of slurries to the stormwater conveyance system or receiving waters is prohibited.</p> <p>D. Rinse water shall be confined to a designated area such as a sanitary sewer, dead-end sump, process treatment system, or hole where water percolates or evaporates and solids are removed for collection and disposal. Rinse water and solids shall be re-used, recycled, or disposed of in accordance with this chapter.</p> <p>E. Wash water shall be directed to an approved sanitary sewer or landscaped locations.</p> <p><u>WPO Section 67.808(a)(10)(B) -- Landscaping and grounds keeping</u></p> <p>ii. Paved surfaces such as sidewalks shall be cleaned regularly using dry clean-up methods such as sweeping or vacuuming. Hosing is permissible only after surfaces have previously been cleaned using dry methods, and only if precautions have been taken to prevent the discharge of runoff to the storm drain.</p>
<b>B.2.d Animal Grooming and Washing</b>	<p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <p>(D) Rinse water shall be confined to a designated area such as a sanitary sewer, dead-end sump, process treatment system, or hole where water percolates or evaporates and solids are removed for collection and disposal. Rinse water and solids shall be re-used, recycled, or disposed of in accordance with this chapter.</p> <p>(E) Wash water shall be directed to an approved sanitary sewer or to approved landscaped locations.</p> <p><u>WPO Section 67.808(a)(8) (C) -- Solid, non-hazardous waste</u></p> <p>v. All areas where livestock, horses or other large animals are confined shall be bermed or curbed in a manner that avoids a discharge to the stormwater conveyance system or receiving water. If berms or curbs are not practicable, manure shall be cleaned up at least twice weekly and must be composted or properly stored prior to disposal.</p>

**B.3 VEHICLE AND EQUIPMENT  
FUELING**

WPO Section 67.808(a)(6) -- Housekeeping

(B) Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.

WPO Section 67.808(a)(8)(A) -- Spill prevention and response

- i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.
- ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.
- iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.

WPO Section 67.808(a)(8)(B) -- Hazardous materials and hazardous wastes

- i. Hazardous materials and wastes shall be stored, managed, and disposed in accordance with applicable federal, state and local laws and regulations.

Stormwater Standards Manual

Section C.2.7.1: The following conditions apply to the fueling of vehicles and equipment at Regulated Commercial Facilities:

- (a) Precautions shall be taken to prevent spills and leaks during fueling activities.
- (b) Materials and equipment necessary for spill response shall be maintained and kept readily accessible, and staff conducting fueling activities instructed in their proper use.
- (c) Significant spills shall be reported promptly to the County's Stormwater Hotline. Significant spills are those which discharge, or have the potential to discharge, contaminants directly or indirectly to the Stormwater Conveyance System or Receiving Waters. Spills of hazardous materials shall be reported to the County's Complaint hotline. Spills which have been completely contained and cleaned up on-site are not considered significant unless they pose a threat to human health or safety.

Stormwater Standards Manual

Section C.3.2.1: In addition to the requirements of Section 2.7.1, the following conditions apply to the fueling of vehicles and equipment at High Priority Commercial Facilities:

- (a) Storm drain inlets located within or downgradient of fueling areas shall be covered or otherwise protected (e.g., with an oil-water separator) to prevent the entry of spilled fuel.
- (b) Vehicles and equipment shall only be fueled in areas where adequate precautions have been taken to prevent the entry of spills into the Stormwater Conveyance System or Receiving Waters. Designated fueling areas are required where practicable.
- (c) The retrofitting of existing facilities with structural controls such as low-flow sumps or oil/water separators shall be considered to prevent the entry of spills into the Stormwater Conveyance System or Receiving Waters. The use of structural controls is not required, but is encouraged where practicable. Pursuant to Ordinance Section 67.804(i), the County may order the use of structural controls.

**C.13 Field Training and Drills**

WPO Section 67.806(a) – General BMP Requirements

(4) Protect, from erosion, those slopes that have been disturbed by clearing, grading, or landscaping and are more than three feet in height or steeper than 3:1 (run-to-rise). Slope protection shall occur prior to the first rainy season following the clearing, grading or landscaping of the slope and continuously thereafter.

(8) Use dry methods such as sweeping, vacuuming, raking, and application of absorbents to cleanup Pollutants, unless wet cleanup methods are otherwise allowed in this Chapter.

WPO Section 67.808(a)(7) -- Liquid waste management

I. Wastewater shall be disposed to the sanitary sewer at the job site or to a holding tank. Disposal of wastewater contained in holding tanks shall be disposed of to the sanitary sewer at the business's company headquarters or at an approved location.

WPO Section 67.808(a)(8)(A) -- Spill prevention and response

- i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.
- ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.
- iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.

WPO Section 67.808(a)(8)(B) -- Hazardous Materials and hazardous wastes

- i. Hazardous materials and wastes shall be stored, managed, and disposed in accordance with applicable federal, state and local laws and regulations.
- ii. Hazardous materials and wastes shall be stored above the ground. Where practicable, provide overhead coverage for all outside hazardous materials or waste storage areas. If overhead coverage is not available, stored materials shall be covered with an impervious material such as a tarp or other similar method.
- iii. Paints, coatings, thinners, and other materials shall be disposed of in accordance with this chapter.
- iv. Secondary containment of hazardous waste shall be provided around storage areas from which a significant potential exists to discharge materials or wastes to the stormwater conveyance system or receiving waters.
- v. Hazardous waste storage areas shall be inspected by the owner or operator, at least once prior to the rainy season and monthly during the rainy season.
- vi. Pesticides and other chemical products shall be used, stored, and disposed of in accordance with applicable federal, state, and local laws and regulations.
- vii. The outdoor application of fertilizers and pesticides is prohibited during rainfall.
- viii. Pesticide use shall be reduced to the MEP in areas where recurring applications of pesticides are performed.

WPO Section 67.808(a)(8)(C) -- Solid, non-hazardous waste

- i. Trash storage and disposal areas shall be kept clean and free of debris.
- ii. Dumpsters, grease bins, and other containers shall be maintained in a clean and leak proof condition and shall be kept securely closed when not in use.
- iii. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.
- iv. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.
- v. All areas where livestock, horses or other large animals are confined shall be bermed or curbed in a manner that avoids a discharge to the stormwater conveyance system or receiving water. If berms or curbs are not practicable, manure shall be cleaned up at least twice weekly and must be composted or properly stored prior to disposal.

**C.14 Fire Access Roads / Fire  
Breaks Maintenance / Creation**

WPO Section 67.806(a) – General BMP Requirements

(4) Protect, from erosion, those slopes that have been disturbed by clearing, grading, or landscaping and are more than three feet in height or steeper than 3:1 (run-to-rise). Slope protection shall occur prior to the first rainy season following the clearing, grading or landscaping of the slope and continuously thereafter.

WPO Section 67.808(a)(10) – Outdoor Areas—housekeeping and grounds keeping practices.

(A) Storm drain inlets located within or down gradient of the activity shall be covered or otherwise protected from the entry of pollutants during hours of operation.

WPO Section 67.808(a)(8)(A) -- Spill prevention and response

- i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.
- ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.
- iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.

WPO Section 67.808(a)(8)(B) -- Hazardous Materials and hazardous wastes

- i. Hazardous materials and wastes shall be stored, managed, and disposed in accordance with applicable federal, state and local laws and regulations.
- ii. Hazardous materials and wastes shall be stored above the ground. Where practicable, provide overhead coverage for all outside hazardous materials or waste storage areas. If overhead coverage is not available, stored materials shall be covered with an impervious material such as a tarp or other similar method.
- iii. Paints, coatings, thinners, and other materials shall be disposed of in accordance with this chapter.
- iv. Secondary containment of hazardous waste shall be provided around storage areas from which a significant potential exists to discharge materials or wastes to the stormwater conveyance system or receiving waters.
- v. Hazardous waste storage areas shall be inspected by the owner or operator, at least once prior to the rainy season and monthly during the rainy season.
- vi. Pesticides and other chemical products shall be used, stored, and disposed of in accordance with applicable federal, state, and local laws and regulations.
- vii. The outdoor application of fertilizers and pesticides is prohibited during rainfall.
- viii. Pesticide use shall be reduced to the MEP in areas where recurring applications of pesticides are performed.

WPO Section 67.808(a)(8)(C) -- Solid, non-hazardous waste

- i. Trash storage and disposal areas shall be kept clean and free of debris.
- ii. Dumpsters, grease bins, and other containers shall be maintained in a clean and leak proof condition and shall be kept securely closed when not in use.
- iii. Materials and equipment necessary for the clean-up of trash and debris shall be maintained and kept readily accessible.
- iv. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.
- v. All areas where livestock, horses or other large animals are confined shall be bermed or curbed in a manner that avoids a discharge to the stormwater conveyance system or receiving water. If berms or curbs are not practicable, manure shall be cleaned up at least twice weekly and must be composted or properly stored prior to disposal.

Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.</p>

**Category D: General Outdoor Areas and Activities**

**D.1 PARKING, ROOFTOPS,  
AND STORAGE AREAS**

WPO Section 67.808(a)(10)(C) -- Parking lots and vehicle storage areas

- i. Wet clean-up methods may only be used where adequate precautions have been taken to prevent the entry of wash water and other contaminants into the stormwater conveyance system or receiving waters.
- ii. Vehicle maintenance and repair operations with the potential to release pollutants are prohibited at commercial parking lots and storage facilities.

WPO Section 67.808(a)(10)(D) -- Rooftops

- i. Materials which may contaminate stormwater shall not be stored on rooftops unless adequate precautions have been taken to prevent their contact with stormwater.
- ii. Equipment such as emergency generators, HVAC systems and other similar items located on rooftops shall be inspected and preventive maintenance conducted to prevent leaks and spills.
- iii. Substances such as bird droppings, grease, leaves, that have accumulated on rooftops shall be removed, as practicable, to prevent or reduce the discharge of contaminants directly or indirectly to the stormwater conveyance system or receiving waters.
- iv. Where feasible, roof downspouts shall be routed away from work areas and toward pervious areas such as lawns, except where required under section 67.812.

Stormwater Standards Manual

Section C.2.8.1: The following condition applies to rooftop areas at Regulated Commercial Facilities:

- (a) Materials which may contaminate stormwater shall not be stored on rooftops unless adequate precautions have been taken to prevent their contact with stormwater.

C.2.8.2: The following conditions apply to parking areas at Regulated Commercial Facilities:

- (a) Parking areas shall be periodically cleaned using dry methods (manual sweeping, street sweepers, etc.). Wet methods shall only be used where adequate precautions have been taken to prevent the entry of wash water and other contaminants into the Stormwater Conveyance System or Receiving Waters.
- (b) Prior to any improvement or expansion project, parking areas designed to accommodate 100 or more vehicles shall be evaluated to establish the level of post-construction BMPs that will meet the MEP standards. Treatment or infiltration BMPs shall be installed if necessary to meet the MEP standard. Installed controls shall be inspected and maintained as necessary to ensure their continued proper functioning.

Stormwater Standards Manual

Section C.2.8.2: The following conditions apply to parking areas at Regulated Commercial Facilities:

- (a) Parking areas shall be periodically cleaned using dry methods (manual sweeping, street sweepers, etc.). Wet methods shall only be used where adequate precautions have been taken to prevent the entry of wash water and other contaminants into the Stormwater Conveyance System or Receiving Waters.
- (b) Prior to any improvement or expansion project, parking areas designed to accommodate 100 or more vehicles shall be evaluated to establish the level of post-construction BMPs that will meet the MEP standards. Treatment or infiltration BMPs shall be installed if necessary to meet the MEP standard. Installed controls shall be inspected and maintained as necessary to ensure their continued proper functioning.

	<p><u>Stormwater Standards Manual</u></p> <p>Section C.3.3.1: In addition to the requirements of Section 2.8.1, the following conditions apply to rooftop areas at High Priority Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) Equipment located on rooftops (e.g., emergency generators, HVAC systems, etc.) shall be periodically inspected, and preventive maintenance conducted as necessary to prevent leaks and spills.</li> <li>(b) Materials and substances (bird droppings, grease, leaves, etc.) that have accumulated on rooftops shall be periodically inspected and removed as necessary to prevent or reduce the discharge of contaminants directly or indirectly to the Stormwater Conveyance System or Receiving Waters.</li> <li>(c) Where practicable, roof downspouts shall be routed away from work areas. Unless filtered to remove pollutants, water from downspouts shall be routed toward pervious areas such as lawns where practicable.</li> </ul>
	<p><u>Stormwater Standards Manual</u></p> <p>Section C.3.3.2: In addition to the requirements of Section 2.8.2, the following conditions apply to parking areas at High Priority Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) Where practicable, trash containers shall be provided in convenient locations to discourage littering.</li> <li>(b) Vehicles stored in parking areas for extended periods shall be periodically inspected, and leaks and spills cleaned as necessary.</li> <li>(c) Parking areas shall be periodically inspected, and significant accumulations of materials and substances (oil, fuel, grease, leaves, etc.) removed. All materials shall be properly disposed.</li> <li>(d) Storm water run-on should be prevented from contacting stored materials and equipment that may contaminate storm water through the use of berms, dikes, or other diversion structures or through the use of measures to elevate waste from site surfaces.</li> </ul>
<b>D.2 BUILDING and GROUNDS MAINTENANCE</b>	
<b>D.2.a Landscaping Activities</b>	<p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <p>O. Where irrigation tail-water return ponds are used, the ponds shall be designed with the appropriate vertical separation between the base of the pond and the seasonal high groundwater mark and must be lined or managed to prevent the movement of water-soluble chemicals to the groundwater and to stormwater flows.</p> <p><u>WPO Section 67.808(a)(10)(B) -- Landscaping and grounds keeping</u></p> <ul style="list-style-type: none"> <li>i. Exposed slopes shall be stabilized as soon as possible.</li> <li>ii. Paved surfaces such as sidewalks shall be cleaned regularly using dry clean-up methods such as sweeping or vacuuming. Hosing is permissible only after surfaces have previously been cleaned using dry methods, and only if precautions have been taken to prevent the discharge of runoff to the storm drain.</li> </ul>
	<p><u>Stormwater Standards Manual</u></p> <p>Section C.2.8.3: The following conditions apply to landscaping and grounds keeping conducted at Regulated Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) Precautions shall be taken to prevent spills, leaks, and over-application of chemical products during landscaping and grounds keeping activities.</li> <li>(b) Precautions shall be taken to prevent over-irrigation of landscaped areas.</li> <li>(c) Pesticides, herbicides, fertilizers, and other chemical products shall be used in accordance with label directions. These products shall not be disposed to streets or gutters, but shall be collected and properly disposed.</li> <li>(d) Grounds and landscaped areas shall be periodically inspected. Litter, debris, organic matter (leaves, cut grass, etc.), and other materials with the potential to contaminate stormwater shall be collected and properly disposed.</li> <li>(e) Materials and equipment necessary for spill response shall be maintained and kept readily accessible, and employees trained in their proper use.</li> <li>(f) Significant spills shall be reported promptly to the County's Stormwater Hotline. Significant spills are those which discharge, or have the potential to discharge, contaminants directly or indirectly to the Stormwater Conveyance System or Receiving Waters. Spills of hazardous materials shall be reported to the County's Complaint hotline. Spills which have been completely contained and cleaned up on-site are not considered significant unless they pose a threat to human health or safety.</li> </ul>

	<p><u>Stormwater Standards Manual</u></p> <p>Section C.3.3.3: In addition to the requirements of Section 2.8.3, the following conditions apply to landscaping and grounds keeping conducted at High Priority Commercial Facilities:</p> <ul style="list-style-type: none"> <li>(a) The application of pesticides, fertilizers, and other chemical products prior to irrigation or rainfall is discouraged.</li> <li>(b) Product containers shall be kept in good condition, shall be kept securely closed when not in use, and shall be stored in a manner that protects them from contact with storm water.</li> <li>(c) Protective measures shall be taken to ensure that stored pesticides, fertilizers, and other chemicals do not contact stormwater.</li> <li>(d) Integrated Pest Management (IPM) practices and other non-chemical pest control methods (e.g., traps, sticky tape, hot-wire lamps, etc.) shall be considered where practicable.</li> <li>(e) Exposed slopes shall be stabilized as soon as possible.</li> <li>(f) Paved surfaces such as sidewalks shall be cleaned regularly using dry methods (e.g., sweeping, vacuuming, etc.). Hosing is permissible only after surfaces have previously been cleaned using dry methods, and only if precautions have been taken to prevent the discharge of runoff to the storm drain.</li> <li>(g) Stockpiles and bulk materials, such as soil, fertilizer, and potting mixture shall be covered during windy and rainy conditions when practicable.</li> </ul>
<b>D.2.b Pesticide, Herbicide, and Fertilizer Application</b>	<p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <ul style="list-style-type: none"> <li>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</li> <li>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</li> <li>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</li> </ul> <p><u>WPO Section 67.808(a)(8)(B) -- Hazardous Materials and hazardous wastes</u></p> <ul style="list-style-type: none"> <li>vi. Pesticides and other chemical products shall be used, stored, and disposed of in accordance with applicable federal, state, and local laws and regulations.</li> <li>vii. The outdoor application of fertilizers and pesticides is prohibited during rainfall.</li> <li>viii. Pesticide use shall be reduced to the MEP in areas where recurring applications of pesticides are performed</li> </ul>
<b>D.2.c Pool, Spa, and Fountain Maintenance</b>	<p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <ul style="list-style-type: none"> <li>J. Discharging backwash wastewater to the stormwater conveyance system or receiving waters is prohibited. Backwash wastewater may be disposed to the sanitary sewer; to a holding tank or settling pond; or where allowed by this chapter, by infiltration to the soil.</li> <li>K. Pool, spa, and fountain water intended for discharge to the stormwater conveyance system shall contain a concentration of zero ppm chlorine or bromine prior to discharge.</li> <li>L. Pool, spa, and fountain water discharged after acid washing shall be neutralized to a pH of 7.2 - 8.0.</li> </ul> <p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <ul style="list-style-type: none"> <li>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</li> <li>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</li> <li>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</li> </ul>

<p><b>D.2.e Sidewalks and Paved Areas</b></p>	<p><u>WPO Section 67.808(a)(6) – Housekeeping.</u></p> <p>A. The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.</p> <p>B. Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.</p> <p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <p>N. Wash and rinse water from building and pavement washing that cannot be properly disposed of at the job site shall be collected and contained for recycling, reuse, or proper disposal.</p> <p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <p>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</p> <p>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p> <p><u>WPO Section 67.808(a)(10)(B) -- Landscaping and grounds keeping</u></p> <p>ii. Paved surfaces such as sidewalks shall be cleaned regularly using dry clean-up methods such as sweeping or vacuuming. Hosing is permissible only after surfaces have previously been cleaned using dry methods, and only if precautions have been taken to prevent the discharge of runoff to the storm drain.</p>
<p><b>D.2.f Break Areas and Public Areas</b></p>	<p><u>WPO Section 67.808(a)(6) – Housekeeping.</u></p> <p>A. The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.</p> <p>B. Areas where work is being actively conducted shall be cleaned daily using dry clean-up methods such as sweeping, wiping, vacuuming, or raking. Wet clean-up methods such as hosing may only be used if precautions have been taken to prevent the discharge of wash water or other materials to the stormwater conveyance system or receiving waters.</p> <p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <p>N. Wash and rinse water from building and pavement washing that cannot be properly disposed of at the job site shall be collected and contained for recycling, reuse, or proper disposal.</p> <p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <p>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</p> <p>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p> <p><u>WPO Section 67.808(a)(8) (C) -- Solid, non-hazardous waste</u></p> <p>vi. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.</p> <p><u>WPO Section 67.808(a)(10)(B) -- Landscaping and grounds keeping</u></p> <p>ii. Paved surfaces such as sidewalks shall be cleaned regularly using dry clean-up methods such as sweeping or vacuuming. Hosing is permissible only after surfaces have previously been cleaned using dry methods, and only if precautions have been taken to prevent the discharge of runoff to the storm drain.</p>

<b>D.2.g Pressure Washing</b>	<p><u>WPO Section 67.808(a)(7) -- Liquid waste management</u></p> <p>(A) Wet cleanup methods such as hosing, steaming or pressure washing is prohibited except where adequate precautions have been taken to prevent the discharge of wash water or other pollutants into the stormwater conveyance system or receiving waters. Adequate measure may include filtering all pollutants from the water prior to discharge.</p> <p>(B) Cleaning by using wet methods such as hosing, steam-cleaning, pressure-washing, is prohibited unless adequate precautions have been taken to prevent the entry of wash water and other contaminants into the stormwater conveyance system or receiving waters.</p> <p>(C) Disposal of slurries to the stormwater conveyance system or receiving waters is prohibited.</p> <p>(D) Rinse water shall be confined to a designated area such as a sanitary sewer, dead-end sump, process treatment system, or hole where water percolates or evaporates and solids are removed for collection and disposal. Rinse water and solids shall be re-used, recycled, or disposed of in accordance with this chapter.</p> <p>(E) Wash water shall be directed to an approved sanitary sewer or landscaped locations.</p> <p>(F) Wash racks.</p> <p>i. Wash rack areas shall have perimeter control and be properly sloped to a grated floor drain.</p> <p>ii. Wash rack areas shall drain to the sanitary sewer or to a holding tank.</p> <p>(G) Disposal of wastewater to the stormwater conveyance system, receiving waters, or the ground, is prohibited.</p> <p>(H) If provided, pump-out services for boats, portable toilets, or other holding tanks shall be conducted in a manner that prevents the release of sewage to the stormwater conveyance system or receiving waters.</p> <p>(I) Wastewater shall be disposed to the sanitary sewer at the job site or to a holding tank. Disposal of wastewater contained in holding tanks shall be disposed of to the sanitary sewer at the business's company headquarters or at an approved location.</p> <p>(J) Discharging backwash wastewater to the stormwater conveyance system or receiving waters is prohibited. Backwash wastewater may be disposed to the sanitary sewer; to a holding tank or settling pond; or where allowed by this chapter, by infiltration to the soil.</p> <p>(K) Pool, spa, and fountain water intended for discharge to the stormwater conveyance system shall contain a concentration of zero ppm chlorine or bromine prior to discharge.</p> <p>(L) Pool, spa, and fountain water discharged after acid washing shall be neutralized to a pH of 7.2 - 8.0.</p> <p>(M) If rinse water from the cleaning of portable sanitary toilet closets cannot be properly disposed of to the sanitary sewer at a job site, it shall be contained prior to disposal at the service facility or other approved facility.</p>
<b>D.2.h Fire Sprinkler Testing and Maintenance</b>	
<b>D.2.i Erodible Surfaces and Areas Under Construction</b>	<p><u>WPO Section 67.806(a) – General BMP Requirements</u></p> <p>(4) Protect, from erosion, those slopes that have been disturbed by clearing, grading, or landscaping and are more than three feet in height or steeper than 3:1 (run-to-rise). Slope protection shall occur prior to the first rainy season following the clearing, grading or landscaping of the slope and continuously thereafter.</p>

<b>D.3 ROADS AND STREETS</b>	
<b>D.3.a Road and Street Maintenance</b>	<p><u>WPO Section 67.808(a)(8) (C) -- Solid, non-hazardous waste</u></p> <p>vi. Loose aggregate, mortar, and dust shall be routinely cleaned up using dry cleanup methods such as sweeping or vacuuming. Wet methods may be used only if necessary to adequately clean equipment for reuse, or where water must be used to lubricate and flush a cut, but only if performed in accordance with this chapter.</p> <p><u>WPO Section 67.808(a)(6) -- Housekeeping</u></p> <p>(A) The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.</p> <p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <p>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</p> <p>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p>
<b>D.3.b Road and Street Use</b>	<p><u>WPO Section 67.808(a)(6) -- Housekeeping</u></p> <p>(A) The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.</p> <p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p>
<b>D.4 STORM DRAIN SYSTEMS</b>	
<b>D.4.a Operation and Maintenance</b>	<p><u>WPO Section 67.808(a)(6) -- Housekeeping</u></p> <p>(A) The property on which the business activity is located shall be inspected for accumulations of debris, litter, waste, organic matter, such as leaves or cut grass or other materials. Such accumulations shall be removed and disposed of in accordance with this chapter.</p>
<b>D.4.b Illicit Discharges and Connections</b>	<p><u>WPO Section 67.806(a) – General BMP Requirements</u></p> <p>(3) Eliminate illicit connections.</p> <p><u>WPO Section 67.808(a)(8)(A) -- Spill prevention and response</u></p> <p>i. Materials and equipment necessary for spill response shall be maintained and kept readily accessible.</p> <p>ii. All operators, employees, and workers conducting potential discharge activities shall be trained in their proper use.</p> <p>iii. Spills and leaks shall be promptly cleaned up and the generated waste disposed of in accordance with the applicable federal, state and local laws and regulations.</p> <p>(A) Storm drain inlets located within or down gradient of the activity shall be covered or otherwise protected from the entry of pollutants during hours of operation.</p>

Updated June 03, 2008

## Attachment 7.4 – Mobile Source Profiles

1. **Mobile Automobile Repair, Maintenance, Fueling, and Cleaning**
2. **Mobile Equipment Repair, Maintenance, Fueling, and Cleaning**
3. **Mobile Vehicle Body Repair and Painting**
4. **Mobile Automobile or Other Vehicle Washing**
5. **Pest Control Services**
6. **Mobile Carpet, Drape or Furniture Cleaning**
7. **Cement Mixing or Cutting**
8. **Masonry**
9. **Painting and Coating**
10. **Landscaping**
11. **Pool and Fountain Cleaning**
12. **Portable Sanitary Services**
13. **Power Washing Services**

## 1. Mobile Automobile Repair, Maintenance, Fueling, and Cleaning

### Applicable SIC Codes

7538 – General Automotive Repair

7539 – Automotive Repair, Nec

7549 – Automotive Services (wrecking, undercoating, rust proofing, lubrication)

### Description

This category includes mobile businesses primarily engaged in the repair of damaged motor vehicles such as repair of engines, transmissions, suspensions, and other mechanical components of motor vehicles at locations other than their own base of operation. Many of the tasks performed for this category are not generally associated with the body or interior work. These businesses may also perform preventive maintenance such as removal and replacement of vehicle fluids including fuel and the cleaning of automotive parts and equipment. This category includes vehicle mechanic companies who provide offsite services and repair.

Table 7.4.1 lists the Pollutant-generating Activities potentially associated with mobile automobile repair, maintenance, fueling and cleaning, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.1 – Pollutant-Generating Activities and Associated Pollutants of Concern for Mobile Automobile Repair, Maintenance, Fueling and Cleaning**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides
Category A: Management of Materials , Equipment, and Wastes

## **2. Mobile Equipment Repair, Maintenance, Fueling, and Cleaning**

### Applicable SIC Codes

7519 – Utility Trailer Rentals  
7353 – Heavy Construction Equipment Rentals  
7359 – Equipment Rental  
7623 – Refrigeration Services and Repair (Refrigerator, HVAC, etc.)  
7692 – Welding Repair  
7699 – Equipment Repair

### Description

This category includes mobile businesses primarily engaged in the repair and maintenance of equipment, body parts and interior finishing; repaint body surfaces; and repair and/or replace of automotive glass at locations other than their own base of operation. This category also includes metal repair of defective automobile body parts. This category includes equipment rental and repair mechanics that perform work other than at their business location.

Table 7.4.2 lists the Pollutant-generating Activities potentially associated with mobile equipment repair, maintenance, fueling and cleaning, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.2 – Pollutant-Generating Activities and Associated Pollutants of Concern for Mobile Equipment Repair, Maintenance, Fueling and Cleaning**

### 3. Mobile Vehicle Body Repair and Painting

#### Applicable SIC Codes

7532 – Top & body repair & paint shops

7536 – Automotive Glass Replacement Shops

7549 – Automotive Services (wrecking, undercoating, rust proofing, lubrication)

#### Description

This category includes mobile businesses engaged in the repair of automotive tops, bodies, and interiors, or automotive painting and refinishing at locations other than their own base of operation. Operations associated with this category generally include exterior, interior and frame repair of vehicles, which may include windshield removal/replacement, metal parts fabrication, and removing and replacing fluids to gain access to areas requiring repair. This category includes all vehicle body repair and painting contractors that perform work at sites other than at their own business location.

Table 7.4.3 lists the Pollutant-generating Activities potentially associated with vehicle body repair and painting, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.3 – Pollutant-Generating Activities and Associated Pollutants of Concern for Vehicle Body Repair and Painting**

#### 4. Mobile Vehicle Washing

<u>Applicable SIC Codes</u>
-----------------------------

7542 – Car Washing
--------------------

##### Description

This category includes mobile businesses engaged in providing service for vehicle washing and detailing services at locations other than their own base of operation. Detailing is the practice of performing an extremely thorough cleaning, polishing and waxing (etc.) of a vehicle. Elements of exterior detailing include claying, polishing, and waxing. Interior detailing involves the cleaning of the interior of a vehicle using vacuums, liquid cleaners, and brushes. Engine detailing involves cleaning of the engine bay area to remove dirt and grease with the use of pressure washers, degreasers and all-purpose cleaners. This category includes any cleaning business that performs work on vehicles at sites other than at their own business location.

Table 7.4.4 lists the Pollutant-generating Activities potentially associated with Mobile Vehicle Washing, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

## 5. Pest Control Services

### Applicable SIC Codes

7342 – Disinfecting & pest control services.

### Description

This category includes mobile businesses primarily engaged in providing properly trained pest management services to resolve pest problems, these professionals offer services such as identification, and inspection of pest infestations, find the nature and extent of the problem, and use the best methods to control pests. These operations are primarily mobile in nature and rarely take place at a base of operation. These businesses also perform services for treatment, application, and mixing of pesticides (herbicides, fungicides, or insecticides) using sprays, dusts, vapors, baits, or soil incorporation on trees, shrubs, lawns, botanical crops, or structures. These businesses fall into two groups:

- a. **Structural:** Pest control services are provided to the industrial commercial, business section and households, and
- b. **Agricultural:** Pest control services are provided or offered to agricultural sites.

Table 7.4.5 lists the Pollutant-generating Activities potentially associated with Pest Control Services, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.5 – Pollutant-generating Activities and Associated Pollutants of Concern for Pest Control Services**

## 6. Mobile Carpet, Drape or Furniture Cleaning

### Applicable SIC Codes

7217 – Carpet and upholstery cleaning

### Description

This category includes mobile businesses primarily engaged in a full range of cleaning services for all fabrics such as carpet, drape, furniture, rugs and upholstery cleaning. Operations usually include steam cleaning or pressure cleaning of fabric materials damaged by floods, pet stains, odors, dirt, food, etc. This category includes any cleaning business that performs work on carpets or upholstery at sites other than at their own business location.

Table 7.4.6 lists the Pollutant-generating Activities potentially associated with Pest Control Services, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.6 – Pollutant-generating Activities and Associated Pollutants of Concern for Mobile Carpet, Drape or Furniture Cleaning**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides

## 7. Cement Mixing or Cutting

### Applicable SIC Codes

3241 – Cement, hydraulic

### Description

This category includes mobile businesses primarily engaged in the mixing of concrete or other type material as well as the cutting of concrete, masonry or other type materials (bricks, etc.). Mixing operations primarily consist of the addition of water or another liquid to a building material to produce a structural component such as concrete or mortar. Cutting operations primarily consist of adding water or other type liquid to lubricate a cutting tool as it slices through building materials.

Table 7.4.7 lists the Pollutant-generating Activities potentially associated with Cement Mixing or Cutting, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.7 – Pollutant-generating Activities and Associated Pollutants of Concern for Cement Mixing or Cutting**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides
Category A: Management of Materials , Equipment, and Wastes

## 8. Masonry

<u>Applicable SIC Codes</u>
-----------------------------

1741 – Masonry and other stone work
-------------------------------------

### Description

This category includes mobile businesses primarily engaged in stone, brick and tile work. Operations generally consist of mixing mortar and concrete as well as cutting tile, stone and bricks. This category includes all masonry work performed at sites other than at their own business location

Table 7.4.8 lists the Pollutant-generating Activities potentially associated with Masonry activities, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.8 – Pollutant-generating Activities and Associated Pollutants of Concern for Masonry**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides
Category A: Management of Materials , Equipment, and Wastes										
	A.1	MATERIALS MANAGEMENT								
	A.1.a	Materials Loading & Unloading	⊙		⊙	⊙		⊙		
	A.3	WASTE HANDLING, STORAGE, AND DISPOSAL								
◆	A.3.a	Hazardous Waste								
	A.3.b	Solid Waste	⊙		⊙					
	A.3.e	Liquid Waste	⊙	⊙

## 9. Painting and Coating Activities

### Applicable SIC Codes

1721 – Painting and Paper Hanging

3479 – Coating, Engraving, and Allied Services, Not Elsewhere Classified

### Description

This category includes mobile businesses primarily engaged in applying paints, coatings, stains, varnishes, lacquers, enamels, shellacs, and water repellent coatings at locations other than their own base of operation. Operations generally include the application of paint or coating by brush, roller, or pneumatic applicator. This category includes all painters and coaters who perform work in sites other than at their own business location

Table 7.4.9 lists the Pollutant-generating Activities potentially associated with Painting and Coating Activities, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.9 – Pollutant-generating Activities and Associated Pollutants of Concern for Painting and Coating Activities**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides

Category D: Outdoor Areas and Activities										
	D.2	BUILDING and GROUNDS MAINTENANCE								
	D.2.f	Pressure Washing	⊙	⊙	⊙	⊙	⊙	⊙	⊙	⊙

## 10. Landscaping

### Applicable SIC Codes

0782 - Law and Garden Services  
0783-Ornamental Shrub and Tree Services

### Description

This category includes mobile businesses primarily engaged in maintaining grounds or landscape of a property using hand or power tools or equipment. Operations may include any combination of the following: sod laying, mowing, trimming, planting, watering, fertilizing, digging, raking, and sprinkler installation.

Table 7.4.10 lists the Pollutant-generating Activities potentially associated with Landscaping, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.10 – Pollutant-generating Activities and Associated Pollutants of Concern for Landscaping**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides
Category A: Management of Materials , Equipment, and Wastes

## 11. Pool and Fountain Cleaning

<u>Applicable SIC Codes</u>
-----------------------------

7389 – Swimming Pool Services
-------------------------------

### Description

This category includes mobile businesses primarily engaged in washing or cleaning pools, fountains and other water features, like spas and ponds, for their sanitation. Operations generally include adding chemicals, checking Ph, removing debris and trash and adding and emptying water. These operations primarily occur offsite away from the businesses base of operation.

Table 7.4.11 lists the Pollutant-generating Activities potentially associated with Pool and Fountain Cleaning, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.11 – Pollutant-generating Activities and Associated Pollutants of Concern for Pool and Fountain Cleaning**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides

## 12. Portable Sanitary Services

<u>Applicable SIC Codes</u>
-----------------------------

4959 – Sanitary Services
--------------------------

### Description

This category includes mobile businesses primarily engaged in the rental, maintenance and cleaning of portable toilets and disposal of sanitary wastes. These businesses provide services for the industrial and event sectors and supply portable sanitation services from the small events to largest construction projects. Operations for these contractors occur both at their base of operations and offsite, for the purposes of the mobile business category, the County is primarily concerned about the activities that occur offsite.

Table 7.4.12 lists the Pollutant-generating Activities potentially associated with Portable Sanitary Services, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.12 – Pollutant-generating Activities and Associated Pollutants of Concern for Portable Sanitary Services**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)							
			Sediment	Nutrients	Trash	Metals	Bacteria	Oil & Grease	Organics	Pesticides
Category A: Management of Materials , Equipment, and Wastes

### 13. Power Washing Services

<u>Applicable SIC Codes</u>
-----------------------------

1799 – Special Trade Contractors
----------------------------------

#### Description

This category includes mobile businesses primarily engaged in using pneumatic devices to pressurize water to clean surfaces. Operations usually generate wastewater and other trash and debris that could significantly impact the MS4 and receiving waters. Power washing can be performed on buildings, pavement, impervious surfaces and includes any surface washing.

Table 7.4.13 lists the Pollutant-generating Activities potentially associated with Power Washing Services, and indicates the Pollutants-of-Concern (POCs) typically associated with them. Specific PGAs and POCs will vary depending on actual operations and practices, and may therefore differ from those presented. Black diamonds indicate that the corresponding PGA is considered a priority.

**Table 7.4.13 – Pollutant-generating Activities and Associated Pollutants of Concern for Power Washing Services**

Priority PGA (◆)	PGA Reference Number	Pollutant-generating Activity (PGA)	Potential Pollutants-of-Concern (POCs)
