

**Proposition 50 Integrated Regional Water Management (IRWM)
Project Proposal Form**

Detailed guidance on the Integrated Regional Water Management (IRWM) Grant Program can be found on the State Water Resources Control Board's Prop 50 Integrated Regional Water Management (IRWM) grant program web page at: <http://www.swrcb.ca.gov/funding/irwmgp/index.html>. Please familiarize yourself with the general requirements of this program before preparing and submitting a project proposal.

Completed forms should be submitted no later than December 1, 2004, either via email to jon.vanrhyn@sdcounty.ca.gov or mailed to the following location:

Jon Van Rhyn
County of San Diego
Watershed Protection Program
9325 Hazard Way
San Diego CA 92123

PHONE: 858-495-5133

FAX: 858-495-5263

SECTION A – PROJECT INFORMATION

1. Project Title	Flood Control Channel Management Project
2. Contact Information	
⊖ Agency/organization	City of Encinitas
⊖ Address	Engineering Department 505 S. Vulcan Ave. Encinitas, CA 92024
⊖ Phone	(760)633-2632
⊖ E-mail	kweldon@ci.encinitas.ca.us
⊖ Submitted by (name & title)	Katherine Weldon
3. Project Location (City/Community)	Cities of Solana Beach, Encinitas, Carlsbad, Oceanside, San Marcos, Vista and Escondido, San Diego County
4. Watershed (if multiple or regional, please indicate)	Carlsbad Hydrologic Unit (multiple watersheds)
5. Amount Requested	\$500,000
6. Match Information (a minimum 10% match is required for all projects):	
⊖ Estimated match amount	\$50,000
⊖ Has a match been identified (y/n)?	no
⊖ If so, please identify the source(s)	
7. Status of Project (conceptual, designed & ready to build, CEQA completed, etc.)	Conceptual

Flood Control Channel Management Project
Katherine Weldon, City of Encinitas (Carlsbad Watershed Lead)

8. Project Description (less than 100 words)

Flood control channels are capable of producing multiple benefits including flood control, water quality improvement, storm water capture, and habitat enhancement if designed and maintained properly. This project would develop a comprehensive management program that optimizes the multiple purposes of flood control channels. Included in the project is 1) biologic resource studies, 2) hydrologic/hydraulic studies, 3) development of a management plan consisting of optimal channel configuration and maintenance. Permitting requirements for each channel condition will be developed. The management plan will cover a wide range of channel conditions and configurations throughout the watershed and will be applicable to the entire region.

9. Additional information (include photo, regional map, text as needed. Please limit entire document to 3 pages or less):

San Diego County of San Diego
 Watershed Protection Program
 9333 Hazard Way
 San Diego CA 92123
 ONE: 619-457-2133 FAX: 619-457-4542

SECTION 9 - PROJECT INFORMATION

1. Project title

2. Contact information

3. Agency/organization

4. Address

5. Phone

6. E-mail

7. Submitted by (name & title)

8. Project location (City & community)

9. Watershed (if multiple or regional, please indicate)

10. Amount requested

11. Match contribution (a minimum 10% match is required for all projects)

12. Estimated match amount

13. Has a match been identified?

14. If so, please identify the contact

15. Status of project (conceptual, designed & ready to build, CIP completed, etc.)

SECTION B – SUPPLEMENTAL INFORMATION

1. CWC section 79561 states that eligible projects must include one or more of the water management elements listed below (see Guidance Section III.C.). Please check all that apply to your proposed project.

- Programs for water supply reliability, water conservation, and water use efficiency
- Storm water capture, storage, treatment, and management
- Removal of invasive non-native plants, the creation and enhancement of wetlands, and the acquisition, protection, and restoration of open space and watershed lands
- Non-point source pollution reduction, management and monitoring
- Groundwater recharge and management projects
- Contaminant and salt removal through reclamation, desalting and other treatment technologies
- Water banking, water exchange, water reclamation and improvement of water quality
- Planning and implementation of multipurpose flood control programs that protect property; and improve water quality, storm water capture and percolation; and protect or improve wildlife habitat
- Watershed management planning and implementation
- Demonstration projects to develop new drinking water treatment and distribution methods

2. The Dept. of Water Resources (DWR) and State Water Resources Control Board (SWRCB) have established the statewide priorities listed below for guiding the selection of projects for funding (see Guidance Section II.E.). Please check all that apply to your proposed project.

- Reduce conflict between water users or resolve water rights disputes, including interregional water rights issues
- Implementation of Total Maximum Daily Loads that are established or under development
- Implementation of Regional Water Quality Control Board Watershed Management Initiative Chapters, plans, and policies
- Meet Delta Water Quality Objectives
- Implementation of recommendations of the floodplain management task force, desalination task force, or recycling task force;
- Address environmental justice concerns
- Assist in achieving one or more goals of the CALFED Bay-Delta Program

NOTE: The eligibility requirements and statewide priorities listed above should be considered minimum screening criteria for project selection. Additional prioritization criteria will be identified once regional goals have been established for the draft IRWM Plan. In general, applicants should assume that preference will be given to projects that are regional, multi-functional, and able to demonstrate multiple benefits.

NOTE: Proposals that include on-stream or off stream surface water storage facilities are not eligible.
