

Proposition 50 Integrated Regional Water Management (IRWM) Project Proposal Form

SECTION A – PROJECT INFORMATION

1. Project Title	Fill Removal at 2336 Hollister Street
2. Contact Information	
? Name & Title	Michael Handal, Project Manager
? Phone	(619)533-3768
? E-mail	Mhandal@SanDiego.gov
3. Project Location	Tijuana River Valley, City of San Diego
4. Watershed (if multiple or regional, please indicate)	Tijuana River Valley
5. Amount Requested	\$2,500,000
6. Match Information (a minimum 10% match is required for all projects):	
? Estimated match amount	\$250,000
? Has a match been identified (y/n)?	N
? If so, please identify the source(s)	NA
7. Status of Project (conceptual, designed & ready to build, CEQA completed, etc.)	Conceptual
8. Project Description (less than 100 words)	
<p>The project is located within a FEMA special flood hazard area/floodway and regional wildlife corridor. The site encompasses both private (Mrs. Brown) and County property where over 35,000 cubic yards of un-permitted fill material was placed in the attempt to construct a berm around the site following the 1980 winter floods. The fill adversely impacted riparian habitat, obstructed river flows, caused major flooding hazards to adjacent properties and obstructed over 48% of the river channel. The project consists of the removal of approximately 16,000 cubic yards of the fill which will restore the floodway, enhance the natural flow through the valley, and restore the local riparian habitat.</p>	
9. Additional information (include photo, regional map, text as needed. Please limit entire document to 3 pages or less):	
<p>Enclosed, please find the following:</p> <ol style="list-style-type: none"> 1- Project background and information sheet. 2- Site vicinity map. 3- Project site map & photographs. 	

SECTION B – SUPPLEMENTAL INFORMATION

1. CWC section 79561 states that eligible projects must include one or more of the water management elements listed below (see Guidance Section III.C.). Please check all that apply to your proposed project.

- Programs for water supply reliability, water conservation, and water use efficiency
- Storm water capture, storage, treatment, and management
- Removal of invasive non-native plants, the creation and enhancement of wetlands, and the acquisition, protection, and restoration of open space and watershed lands
- Non-point source pollution reduction, management and monitoring
- Groundwater recharge and management projects
- Contaminant and salt removal through reclamation, desalting and other treatment technologies
- Water banking, water exchange, water reclamation and improvement of water quality
- Planning and implementation of multipurpose flood control programs that protect property; and improve water quality, storm water capture and percolation; and protect or improve wildlife habitat
- Watershed management planning and implementation
- Demonstration projects to develop new drinking water treatment and distribution methods

2. The Dept. of Water Resources (DWR) and State Water Resources Control Board (SWRCB) have established the statewide priorities listed below for guiding the selection of projects for funding (see Guidance Section II.E.). Please check all that apply to your proposed project.

- Reduce conflict between water users or resolve water rights disputes, including interregional water rights issues
- Implementation of Total Maximum Daily Loads that are established or under development
- Implementation of Regional Water Quality Control Board Watershed Management Initiative Chapters, plans, and policies
- Meet Delta Water Quality Objectives
- Implementation of recommendations of the floodplain management task force, desalination task force, or recycling task force;
- Address environmental justice concerns
- Assist in achieving one or more goals of the CALFED Bay-Delta Program

NOTE: The eligibility requirements and statewide priorities listed above should be considered minimum screening criteria for project selection. Additional prioritization criteria will be identified once regional goals have been established for the draft IRWM Plan. In general, applicants should assume that preference will be given to projects that are regional, multi-functional, and able to demonstrate multiple benefits.

NOTE: Proposals that include on-stream or off stream surface water storage facilities are not eligible.
