**SANTA MARGARITA  
RIVER WATERSHED**

The County of San Diego is holding the first in an ongoing series of public workshops on the development of a Watershed Management Plan (WMP) for the Santa Margarita Watershed. The County of San Diego is developing the WMP, in cooperation with the County of Riverside, Marine Corps Base Camp Pendleton, and the Cities of Temecula and Murrieta, under partial funding from the State Water Resources Control Board pursuant to the Costa-Machado Water Act of 2000 (Proposition 13). The purpose of these quarterly meetings is to identify stakeholder needs and expectations in developing the watershed management plan to restore and protect water quality in the Santa Margarita Watershed, and to keep stakeholders informed of developments and status of the program. Future meetings will provide an opportunity for groups to present their activities to the stakeholders in an open forum. All interested parties are encouraged to attend.

*Funding for this project has been provided in full or in part through a contract with the State Water Resources Control Board (SWRCB) pursuant to the Costa-Machado Water Act of 2000 (Proposition 13) and any amendments thereto for the implementation of California's Nonpoint Source Pollution Control Program. The contents of this document do not necessarily reflect the views and policies of the SWRCB, nor does mention of trade names or commercial products constitute endorsement or recommendation for use.*
