

REVAMP WATER QUALITY PRIORITY RATING SYSTEM

Detailed Agenda

Thursday August 27, 2009

1:00 – 4:00 pm

County of San Diego, 5201 Ruffin Road, Ste. P, San Diego, CA 92123

- A. Overview – Update/refine the water quality “rating” system to make it more useful. More datasets are being collected and increased integration of datasets is needed. This is the second of three workshops.
- B. Goal for this meeting.
Through brainstorming, evaluate the datasets individually and provide input on how to conduct the assessment. The consultant will be requested to flesh out the details and provide a draft prior to Workshop #3. In Workshop #3, we will fine-tune the assessment.
- C. Summary of Workshop #1 Accomplishments (see attached)
- D. Review Datasets
 - 1. Wet Receiving Water
 - 2. Ambient Receiving Water
 - 3. Wet MS4 Assessment
 - 4. Dry MS4 Assessment
 - 5. Dry Weather Data from Copermittees
 - 6. Coastal Storm Drain Monitoring

Ask the following questions about each data set?

- a. Data to be used
- b. How to present the results for each HAS/drainage area
- c. Benchmarks to use (these have been develop but may need refinement)
- d. Deliverable- map or table?

Overarching Questions:

- 1. How to we integrate the data or do we? Receiving waters data versus MS4 data- treated the same or different?
- 2. Do we apply numbers/letter/color codes?
- 3. Do we acknowledge CWA 303(d) listings?
- 4. Will third party data be incorporated?

F. Next Steps
