

# San Diego River Watershed Workgroup Meeting

August 8, 2003

1:00 – 3:00 p.m.

## Tour of Famosa Slough

Hosted by David Kimball and Jim Peugh  
from Friends of Famosa Slough

The Famosa Slough collects stormwater and urban runoff from the surrounding neighborhood. The runoff flows into treatment ponds before entering the Slough.

Sediment was removed from this area of the Slough and restoration is underway.

Water from the Famosa Slough channel enters the Slough through a culvert underneath W. Point Loma Boulevard.

Area of the Slough where the resident Peking Duck was spotted on the tour.

Water from the San Diego River enters the Famosa Slough Channel through three culverts just south of Interstate 8.

Photo of Famosa Slough looking north at W. Point Loma Boulevard.

Native vegetation around the Famosa Slough.
